
**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended September 30, 2022

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from to

Commission file number 0-26301

United Therapeutics Corporation

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of
Incorporation or Organization)

52-1984749

(I.R.S. Employer
Identification No.)

1040 Spring Street, Silver Spring, MD

(Address of Principal Executive Offices)

20910

(Zip Code)

(301) 608-9292

(Registrant's Telephone Number, Including Area Code)

(Former Name, Former Address and Former Fiscal Year, If Changed Since Last Report)

Securities registered pursuant to Section 12(b) of the Act:

| Title of each class | Trading Symbol(s) | Name of exchange on which registered |
|--|-------------------|--------------------------------------|
| Common Stock, par value \$0.01 per share | UTHR | Nasdaq Global Select Market |

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act:

| | | | |
|-------------------------|-------------------------------------|---------------------------|--------------------------|
| Large accelerated filer | <input checked="" type="checkbox"/> | Accelerated filer | <input type="checkbox"/> |
| Non-accelerated filer | <input type="checkbox"/> | Smaller reporting company | <input type="checkbox"/> |
| | | Emerging growth company | <input type="checkbox"/> |

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the issuer's common stock, par value \$.01 per share, as of October 26, 2022 was 45,576,954.

Notes to Consolidated Financial Statements

September 30, 2022 (Unaudited)

1. Organization and Business Description

United Therapeutics Corporation is a biotechnology company focused on the development and commercialization of innovative products to address the unmet medical needs of patients with chronic and life-threatening conditions. On September 30, 2021, we converted to a Delaware public benefit corporation, with the express public benefit purpose to provide a brighter future for patients through (a) the development of novel pharmaceutical therapies; and (b) technologies that expand the availability of transplantable organs.

We have approval from the U.S. Food and Drug Administration (**FDA**) to market the following therapies: Tyvaso[®] (treprostinil) Inhalation Solution (**Tyvaso**), Tyvaso DPI[®] (treprostinil) Inhalation Powder (**Tyvaso DPI**), Remodulin[®] (treprostinil) Injection (**Remodulin**), Orenitram[®] (treprostinil) Extended-Release Tablets (**Orenitram**), Unituxin[®] (dinutuximab) Injection (**Unituxin**), and Adcirca[®] (tadalafil) Tablets (**Adcirca**). We also derive revenues outside the United States from sales of Tyvaso, Remodulin, and Unituxin.

As used in these notes to our consolidated financial statements, unless the context otherwise requires, the terms “**we**”, “**us**”, “**our**”, and similar terms refer to United Therapeutics Corporation and its consolidated subsidiaries.

2. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the rules and regulations of the U.S. Securities and Exchange Commission (**SEC**) for interim financial information. Accordingly, they do not include all of the information required by U.S. generally accepted accounting principles for complete financial statements. These consolidated financial statements should be read in conjunction with our audited consolidated financial statements and the accompanying notes to our consolidated financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2021, as filed with the SEC on February 24, 2022.

In our management’s opinion, the accompanying consolidated financial statements contain all adjustments, including normal, recurring adjustments, necessary to fairly present our financial position as of September 30, 2022 and December 31, 2021, our statements of operations, comprehensive income, and stockholders’ equity for the three- and nine-month periods ended September 30, 2022 and 2021, and our statements of cash flows for the nine-month periods ended September 30, 2022 and 2021. Interim results are not necessarily indicative of results for an entire year.

Recently Issued Accounting Standards

Accounting Standards Adopted During the Period

None.

Accounting Standards Not Yet Adopted

None.

3. Investments

Marketable Investments

Available-for-Sale Debt Securities

Available-for-sale debt securities are recorded at fair value, with the portion of the unrealized gains and losses that are not credit-related included as a component of *accumulated other comprehensive loss* in stockholders' equity, until realized. Available-for-sale debt securities consisted of the following (in millions):

| As of September 30, 2022 | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|---------------------------------------|-------------------|------------------------|-------------------------|-------------------|
| U.S. government and agency securities | \$ 2,665.8 | \$ 0.1 | \$ (68.7) | \$ 2,597.2 |
| Corporate debt securities | 555.9 | — | (19.3) | 536.6 |
| Total | \$ 3,221.7 | \$ 0.1 | \$ (88.0) | \$ 3,133.8 |

Reported under the following captions in our consolidated balance sheets:

| | |
|------------------------------------|-------------------|
| Cash and cash equivalents | \$ 77.9 |
| Current marketable investments | 1,612.1 |
| Non-current marketable investments | 1,443.8 |
| Total | \$ 3,133.8 |

| As of December 31, 2021 | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|---------------------------------------|-------------------|------------------------|-------------------------|-------------------|
| U.S. government and agency securities | \$ 2,178.9 | \$ 2.0 | \$ (7.3) | \$ 2,173.6 |
| Corporate debt securities | 482.5 | 0.6 | (2.0) | 481.1 |
| Total | \$ 2,661.4 | \$ 2.6 | \$ (9.3) | \$ 2,654.7 |

Reported under the following captions in our consolidated balance sheets:

| | |
|------------------------------------|-------------------|
| Cash and cash equivalents | \$ 39.3 |
| Current marketable investments | 965.5 |
| Non-current marketable investments | 1,649.9 |
| Total | \$ 2,654.7 |

The following tables present gross unrealized losses and fair value for those available-for-sale debt securities that were in an unrealized loss position as of September 30, 2022 and December 31, 2021, aggregated by investment category and length of time that the individual securities have been in a continuous loss position (in millions):

| As of September 30, 2022 | Less than 12 months | | 12 months or longer | | Total | |
|---------------------------------------|---------------------|-------------------------|---------------------|-------------------------|-------------------|-------------------------|
| | Fair Value | Gross Unrealized Losses | Fair Value | Gross Unrealized Losses | Fair Value | Gross Unrealized Losses |
| U.S. government and agency securities | \$ 1,969.6 | \$ (44.9) | \$ 570.3 | \$ (23.8) | \$ 2,539.9 | \$ (68.7) |
| Corporate debt securities | 442.9 | (15.1) | 93.7 | (4.2) | 536.6 | (19.3) |
| Total | \$ 2,412.5 | \$ (60.0) | \$ 664.0 | \$ (28.0) | \$ 3,076.5 | \$ (88.0) |

| As of December 31, 2021 | Less than 12 months | | 12 months or longer | | Total | |
|---------------------------------------|---------------------|-------------------------|---------------------|-------------------------|-------------------|-------------------------|
| | Fair Value | Gross Unrealized Losses | Fair Value | Gross Unrealized Losses | Fair Value | Gross Unrealized Losses |
| U.S. government and agency securities | \$ 1,729.9 | \$ (7.3) | \$ — | \$ — | \$ 1,729.9 | \$ (7.3) |
| Corporate debt securities | 352.3 | (2.0) | — | — | 352.3 | (2.0) |
| Total | \$ 2,082.2 | \$ (9.3) | \$ — | \$ — | \$ 2,082.2 | \$ (9.3) |

At September 30, 2022 and December 31, 2021, we held 403 and 251 available-for-sale debt securities, respectively, that were in an unrealized loss position. In assessing whether the decline in fair value at September 30, 2022 of any of these securities resulted from a credit loss, we consulted with our investment managers and reviewed the credit ratings for each security. We believe that these unrealized losses are a direct result of the current interest rate environment and do not represent an indication of credit loss. We do not intend to sell the investments in unrealized loss positions prior to their maturity and it is not more likely than not that we will be required to sell these investments before recovery of their amortized cost basis. There were no impairments due to credit loss on our available-for-sale debt securities during the three and nine months ended September 30, 2022 and 2021.

The following table summarizes the contractual maturities of available-for-sale debt securities (in millions). Actual maturities may differ from contractual maturities because the issuers of certain of these debt securities have the right to call the securities or prepay their obligations under the securities with or without penalties.

| | As of September 30, 2022 | |
|---------------------------|--------------------------|-------------------|
| | Amortized Cost | Fair Value |
| Due within one year | \$ 1,718.1 | \$ 1,690.0 |
| Due in one to three years | 1,503.6 | 1,443.8 |
| Total | \$ 3,221.7 | \$ 3,133.8 |

Investments in Equity Securities with Readily Determinable Fair Values

We held investments in equity securities with readily determinable fair values of \$36.7 million and \$70.4 million as of September 30, 2022 and December 31, 2021, respectively, which are included in *current marketable investments* in our consolidated balance sheets. Changes in the fair value of publicly-traded equity securities are recorded in our consolidated statements of operations within *other (expense) income, net*. Refer to Note 4—*Fair Value Measurements*.

During the first quarter of 2021, we sold our investment in a publicly-traded company. We received \$108.9 million in cash from the sale of the investment and realized a gain of \$91.9 million. The gain was recorded within *other (expense) income, net* in our consolidated statements of operations for the nine months ended September 30, 2021.

Investments in Privately-Held Companies

As of September 30, 2022 and December 31, 2021, we maintained non-controlling equity investments in privately-held companies of \$28.5 million and \$31.1 million, respectively, in the aggregate. We measure these investments using the measurement alternative because the fair values of these investments are not readily determinable. Under this alternative, the investments are measured at cost, less any impairment, and adjusted for any observable price changes. We include our investments in privately-held companies within *other non-current assets* in our consolidated balance sheets. These investments are subject to a periodic impairment review and, if impaired, the investment is measured and recorded at fair value in accordance with ASC 820, *Fair Value Measurements*.

Variable Interest Entity (VIE)

Consolidation of a VIE

In July 2022, we entered into an operating agreement and trust agreement related to the expected contribution of an asset to a newly created trust of which we are the beneficiary. The trust was created for legal and administrative purposes and is not expected to make future purchases. As the operator of the asset, we are required to incur all future expenses related to the operation and maintenance of the asset. Accordingly, the trust is deemed a VIE because it relies on our capital to sustain future operating expenses. We are deemed the primary beneficiary of the VIE because we are the sole provider of financial support and can unilaterally remove the trustee without cause. Accordingly, we consolidate the VIE's balance sheet and results of operations.

As of September 30, 2022, our consolidated balance sheets included a \$27.9 million asset due to the consolidation of this VIE included within *property, plant, and equipment, net*. Upon consolidating the VIE, which was not deemed a "business" as defined in ASC 805, *Business Combinations*, no gain or loss was recognized. This VIE has no recourse against our assets and general credit, and the VIE assets cannot be used to settle the VIE liabilities. Our total risk of loss is \$27.9 million, the value of the asset we contributed.

4. Fair Value Measurements

We account for certain assets and liabilities at fair value and classify these assets and liabilities within the fair value hierarchy (Level 1, Level 2, or Level 3). Our *other current assets* and *other current liabilities* have fair values that approximate their carrying values.

Part I. Financial Information

Assets and liabilities subject to fair value measurements are as follows (in millions):

| | As of September 30, 2022 | | | |
|--|--------------------------|-------------------|----------------|-------------------|
| | Level 1 | Level 2 | Level 3 | Balance |
| Assets | | | | |
| Money market funds ⁽¹⁾ | \$ 309.4 | \$ — | \$ — | \$ 309.4 |
| Time deposits ⁽¹⁾ | 201.1 | — | — | 201.1 |
| U.S. government and agency securities ⁽²⁾ | — | 2,597.2 | — | 2,597.2 |
| Corporate debt securities ⁽²⁾ | — | 536.6 | — | 536.6 |
| Equity securities ⁽³⁾ | 36.7 | — | — | 36.7 |
| Contingent consideration ⁽⁴⁾ | — | — | 0.7 | 0.7 |
| Total assets | \$ 547.2 | \$ 3,133.8 | \$ 0.7 | \$ 3,681.7 |
| Liabilities | | | | |
| Contingent consideration ⁽⁵⁾ | — | — | 18.9 | 18.9 |
| Total liabilities | \$ — | \$ — | \$ 18.9 | \$ 18.9 |
| | | | | |
| | As of December 31, 2021 | | | |
| | Level 1 | Level 2 | Level 3 | Balance |
| Assets | | | | |
| Money market funds ⁽¹⁾ | \$ 516.7 | \$ — | \$ — | \$ 516.7 |
| U.S. government and agency securities ⁽²⁾ | — | 2,173.6 | — | 2,173.6 |
| Corporate debt securities ⁽²⁾ | — | 481.1 | — | 481.1 |
| Equity securities ⁽³⁾ | 70.4 | — | — | 70.4 |
| Contingent consideration ⁽⁴⁾ | — | — | 1.2 | 1.2 |
| Total assets | \$ 587.1 | \$ 2,654.7 | \$ 1.2 | \$ 3,243.0 |
| Liabilities | | | | |
| Contingent consideration ⁽⁵⁾ | — | — | 20.8 | 20.8 |
| Total liabilities | \$ — | \$ — | \$ 20.8 | \$ 20.8 |

(1) Included in *cash and cash equivalents* in our consolidated balance sheets.

(2) Included in *cash and cash equivalents* and *current and non-current marketable investments* in our consolidated balance sheets. Refer to Note 3—*Investments—Marketable Investments—Available-for-Sale Debt Securities* for further information. The fair value of these securities is principally measured or corroborated by trade data for identical securities for which related trading activity is not sufficiently frequent to be considered a Level 1 input or comparable securities that are more actively traded.

(3) Included in *current marketable investments* in our consolidated balance sheets. The fair value of these securities is based on quoted market prices for identical instruments in active markets. During the three and nine months ended September 30, 2022, we recognized \$8.5 million and \$29.9 million, respectively, of net unrealized and realized losses on these securities. During the three and nine months ended September 30, 2021, we recognized \$18.3 million of net unrealized losses and \$77.2 million of net unrealized and realized gains in the aggregate, respectively, on these securities. We recorded these gains and losses in our consolidated statements of operations within *other (expense) income, net*. Refer to Note 3—*Investments—Marketable Investments—Investments in Equity Securities with Readily Determinable Fair Values*.

(4) Included in *other non-current assets* in our consolidated balance sheets. We estimated the fair value of contingent consideration using a Monte Carlo simulation. The Monte Carlo simulation incorporates Level 3 inputs including price volatility of peer company stocks and the probability of completing certain milestones during a specified period of time. The fair value of our contingent consideration assets decreased by \$0.5 million from December 31, 2021 to September 30, 2022. The loss was recorded within *other (expense) income, net* in our consolidated statements of operations.

(5) Included in *other current* and *other non-current liabilities* in our consolidated balance sheets. The fair value of our contingent consideration obligations has been estimated using probability-weighted discounted cash flow models (**DCF**s). The DCFs incorporate Level 3 inputs, including estimated discount rates, that we believe market participants would consider relevant in pricing and the projected timing and amount of cash flows, which are estimated and developed, in part, based on the requirements specific to each acquisition agreement. The fair value of our contingent consideration liabilities decreased by \$1.9 million from December 31, 2021 to September 30, 2022. The gain was recorded within *research and development* in our consolidated statements of operations.

Fair Value of Financial Instruments

The carrying amounts of *cash and cash equivalents*, *accounts receivable*, *accounts payable*, and *accrued expenses* approximate fair value because of their short maturities. The fair values of our marketable investments and contingent consideration are reported

above within the fair value hierarchy. Refer to Note 3—*Investments*. The carrying value of our debt is a reasonable estimate of the fair value of the outstanding debt based on the variable interest rate of the debt.

5. Inventories

Inventories are stated at the lower of cost (first-in, first-out method) or net realizable value and consist of the following, net of reserves (in millions):

| | September 30, 2022 | | December 31, 2021 | |
|--------------------------|--------------------|-------------|-------------------|-------------|
| Raw materials | \$ | 18.6 | \$ | 17.6 |
| Work-in-progress | | 32.5 | | 31.9 |
| Finished goods | | 39.9 | | 44.3 |
| Total inventories | \$ | 91.0 | \$ | 93.8 |

6. Goodwill and Other Intangible Assets

Goodwill and other intangible assets comprise the following (in millions):

| | As of September 30, 2022 | | | As of December 31, 2021 | | |
|--|--------------------------|--------------------------|----------------|-------------------------|--------------------------|----------------|
| | Gross | Accumulated Amortization | Net | Gross | Accumulated Amortization | Net |
| Goodwill | \$ 28.0 | \$ — | \$ 28.0 | \$ 28.0 | \$ — | \$ 28.0 |
| Other intangible assets: | | | | | | |
| Technology, patents, and trade names | 6.7 | (5.7) | 1.0 | 6.7 | (5.6) | 1.1 |
| In-process research and development ^{(1) (2)} | 15.5 | — | 15.5 | 15.5 | — | 15.5 |
| Total | \$ 50.2 | \$ (5.7) | \$ 44.5 | \$ 50.2 | \$ (5.6) | \$ 44.6 |

(1) In March 2021, we decided to discontinue the U.S. development of Trevyent[®], due to written comments provided by the FDA in February 2021. The FDA provided these written comments following a meeting between us and the FDA to discuss our planned resubmission of our new drug application (**NDA**) for Trevyent in light of a complete response letter issued by the FDA in April 2020. We determined these FDA comments to be a potential indicator of impairment of our in-process research and development (**IPR&D**) asset related to Trevyent and fully impaired the \$107.3 million IPR&D asset during the first quarter of 2021. The impairment charge was recorded within *research and development* in our consolidated statements of operations for the nine months ended September 30, 2021.

(2) In January 2021, we decided to discontinue our research and development efforts related to biomechanical lungs. As a result of the decision, we fully impaired the IPR&D asset related to these efforts, which had a carrying value of \$6.1 million, during the first quarter of 2021. The impairment charge was recorded within *research and development* in our consolidated statements of operations for the nine months ended September 30, 2021.

7. Property, Plant, and Equipment

Property, plant, and equipment consists of the following (in millions):

| | September 30, 2022 | | December 31, 2021 | |
|--|--------------------|--------------|-------------------|--------------|
| Land and land improvements | \$ | 136.3 | \$ | 132.6 |
| Buildings, building improvements, and leasehold improvements | | 630.8 | | 612.7 |
| Buildings under construction | | 94.1 | | 55.1 |
| Furniture, equipment, and vehicles | | 356.2 | | 322.9 |
| Subtotal | | 1,217.4 | | 1,123.3 |
| Less—accumulated depreciation | | (376.6) | | (342.4) |
| Property, plant, and equipment, net | \$ | 840.8 | \$ | 780.9 |

We entered into a commercial supply agreement (**Supply Agreement**) with MannKind Corporation (**MannKind**), under which MannKind is responsible for manufacturing and supplying Tyvaso DPI to us on a cost-plus basis. Unless earlier terminated, the initial term of the Supply Agreement continues until December 31, 2031 and will thereafter be renewed automatically for additional, successive two-year terms unless either party provides notice of non-renewal. We determined that the Supply Agreement contains certain lease components and have elected the expedient to combine lease and non-lease components as a

Part I. Financial Information

single lease component. All payment obligations under the Supply Agreement are variable in nature and we incurred costs of \$16.2 million and \$30.1 million thereunder during the three and nine months ended September 30, 2022, respectively.

In September 2022, we entered into an agreement (**Lease Agreement**) to lease the entirety of a building. The Lease Agreement modified and replaced several of our pre-existing leases of portions of the same building, and has an initial term expiring in July 2027, with five renewal options of five years each, exercisable in our sole discretion. As a result, we remeasured the lease liability at our incremental borrowing rate, using a lease term that assumed we exercise one renewal option, due to our financing of significant leasehold improvements necessary for the research and development activities being performed at this location. As of September 30, 2022, our consolidated balance sheets included a right-of-use asset and lease liability for the building of \$12.2 million. Leasehold improvements were not significant as of September 30, 2022.

8. Debt

2022 Credit Agreement

In March 2022, we entered into a credit agreement (the **2022 Credit Agreement**) with Wells Fargo Bank, National Association (**Wells Fargo**), as administrative agent and a swingline lender, and various other lender parties, which provides for: (1) an unsecured revolving credit facility of up to \$1.2 billion; and (2) a second unsecured revolving credit facility of up to \$800.0 million (which facilities may, at our request, be increased by up to \$500.0 million in the aggregate subject to obtaining commitments from existing or new lenders for such increase and other conditions). The facilities will mature five years after the closing date of the 2022 Credit Agreement on March 31, 2027, subject to the lenders' ability to extend the maturity date by one year if we request such an extension in accordance with the terms of the 2022 Credit Agreement, up to a maximum of two such extensions.

At our option, amounts borrowed under the 2022 Credit Agreement bear interest at either an adjusted Term Secured Overnight Finance Rate (**Term SOFR**) or a fluctuating base rate, in each case, plus an applicable margin determined on a quarterly basis based on our consolidated ratio of total indebtedness to EBITDA (as calculated in accordance with the 2022 Credit Agreement). To date, we have elected to calculate interest on the outstanding balance at an adjusted Term SOFR plus an applicable margin.

On March 31, 2022, we borrowed \$800.0 million under the 2022 Credit Agreement, and used the funds to repay outstanding indebtedness under the 2018 Credit Agreement as discussed below under *2018 Credit Agreement*.

As of September 30, 2022 and December 31, 2021, our outstanding aggregate principal balance under the 2022 Credit Agreement and the 2018 Credit Agreement, respectively, was \$800.0 million, all of which was classified as a non-current liability because we do not intend to repay any portion of this amount within one year.

The 2022 Credit Agreement contains customary events of default and customary affirmative and negative covenants. As of September 30, 2022, we were in compliance with these covenants. Lung Biotechnology PBC is our only subsidiary that guarantees our obligations under the 2022 Credit Agreement though, from time to time, one or more of our other subsidiaries may be required to guarantee our obligations.

In connection with the 2022 Credit Agreement, we capitalized debt issuance costs of \$7.5 million, which are being amortized to *interest expense* over the contractual term of the 2022 Credit Agreement. As of September 30, 2022, \$3.2 million was recorded in *other current assets* and \$11.3 million in *other non-current assets* in our consolidated balance sheets.

The interest expense reported in our consolidated statements of operations for the three and nine months ended September 30, 2022 and 2021 related to our borrowings under the 2022 Credit Agreement and 2018 Credit Agreement.

2018 Credit Agreement

In June 2018, we entered into a credit agreement (the **2018 Credit Agreement**) with Wells Fargo, as administrative agent and a swingline lender, and various other lender parties, providing for: (1) an unsecured revolving credit facility of up to \$1.0 billion; and (2) a second unsecured revolving credit facility of up to \$500.0 million.

On March 31, 2022, we terminated the 2018 Credit Agreement and entered into the 2022 Credit Agreement. We repaid in full all our obligations under the 2018 Credit Agreement in connection with the termination of the 2018 Credit Agreement and our entry into the 2022 Credit Agreement. There were no penalties associated with the early termination of the 2018 Credit Agreement.

9. Share-Based Compensation

As of September 30, 2022, we have two shareholder-approved equity incentive plans: the United Therapeutics Corporation Amended and Restated Equity Incentive Plan (the **1999 Plan**) and the United Therapeutics Corporation Amended and Restated 2015 Stock Incentive Plan (the **2015 Plan**). The 2015 Plan provides for the issuance of up to 11,500,000 shares of our common stock pursuant to awards granted under the 2015 Plan, which includes 500,000 shares added pursuant to an amendment and restatement of the 2015 Plan approved by our shareholders in June 2022. No further awards will be granted under the 1999 Plan. We also have one equity incentive plan, the United Therapeutics Corporation 2019 Inducement Stock Incentive Plan (the **2019 Inducement Plan**), that has not been approved by our shareholders, as permitted by the Nasdaq Stock Market rules. The 2019 Inducement Plan was approved by our Board of Directors in February 2019 and provides for the issuance of up to 99,000 shares of our common stock under awards granted to newly-hired employees. Currently, we grant equity-based awards to employees and members of our Board of Directors in the form of stock options and restricted stock units (**RSUs**) under the 2015 Plan, and we may grant RSUs to newly-hired employees under the 2019 Inducement Plan. Refer to the sections entitled *Stock Options* and *RSUs* below.

We previously issued awards under the United Therapeutics Corporation 2011 Share Tracking Awards Plan (the **STAP**). We refer to awards outstanding under the STAP as **STAP awards**. Refer to the section entitled *STAP Awards* below. We discontinued the issuance of STAP awards in June 2015.

In 2012, our shareholders approved the United Therapeutics Corporation Employee Stock Purchase Plan (**ESPP**), which is structured to comply with Section 423 of the Internal Revenue Code. Refer to the section entitled *ESPP* below.

The following table reflects the components of share-based compensation (benefit) expense recognized in our consolidated statements of operations (in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|-------------------------------------|----------------|------------------------------------|----------------|
| | 2022 | 2021 | 2022 | 2021 |
| Stock options | \$ 5.7 | \$ 5.8 | \$ 16.8 | \$ 19.8 |
| RSUs | 9.9 | 6.2 | 23.6 | 18.4 |
| STAP awards | (18.5) | 12.2 | 0.2 | 54.3 |
| ESPP | 0.5 | 0.4 | 1.4 | 1.3 |
| Total share-based compensation (benefit) expense before tax | \$ (2.4) | \$ 24.6 | \$ 42.0 | \$ 93.8 |

Stock Options

We estimate the fair value of stock options using the Black-Scholes-Merton valuation model, which requires us to make certain assumptions that can materially impact the estimation of fair value and related compensation expense. The assumptions used to estimate fair value include the price of our common stock, the expected volatility of our common stock, the risk-free interest rate, the expected term of stock option awards, and the expected dividend yield.

The following weighted average assumptions were used in estimating the fair value of stock options granted to employees during the nine months ended September 30, 2022 and 2021:

| | September 30, 2022 | September 30, 2021 |
|------------------------------------|--------------------|--------------------|
| Expected term of awards (in years) | 5.7 | 5.7 |
| Expected volatility | 32.5 % | 32.5 % |
| Risk-free interest rate | 2.7 % | 1.0 % |
| Expected dividend yield | — % | — % |

Part I. Financial Information

A summary of the activity and status of stock options under our equity incentive plans during the nine-month period ended September 30, 2022 is presented below:

| | Number of Options | Weighted Average Exercise Price | Weighted Average Remaining Contractual Term (in Years) | Aggregate Intrinsic Value (in millions) |
|--|-------------------|---------------------------------|--|---|
| Outstanding at January 1, 2022 | 7,317,978 | \$ 126.73 | | |
| Granted | 40,029 | 213.18 | | |
| Exercised | (279,451) | 117.66 | | |
| Forfeited/canceled | (2,500) | 130.48 | | |
| Outstanding at September 30, 2022 | 7,076,056 | \$ 127.57 | 3.9 | \$ 579.6 |
| Exercisable at September 30, 2022 | 5,687,422 | \$ 126.14 | 3.7 | \$ 473.5 |
| Unvested at September 30, 2022 | 1,388,634 | \$ 133.45 | 4.7 | \$ 106.1 |

The weighted average fair value of a stock option granted during each of the nine-month periods ended September 30, 2022 and September 30, 2021 was \$75.87 and \$56.69, respectively. These stock options have an aggregate grant date fair value of \$3.0 million and \$2.5 million, respectively. The total grant date fair value of stock options that vested during the nine-month periods ended September 30, 2022 and September 30, 2021 was \$16.3 million and \$50.3 million, respectively.

Total share-based compensation expense related to stock options is recorded as follows (in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|----------------------------------|---------------|---------------------------------|----------------|
| | 2022 | 2021 | 2022 | 2021 |
| Cost of product sales | \$ — | \$ — | \$ — | \$ 0.1 |
| Research and development | 0.1 | — | 0.2 | 0.4 |
| Selling, general, and administrative | 5.6 | 5.8 | 16.6 | 19.3 |
| Share-based compensation expense before taxes | 5.7 | 5.8 | 16.8 | 19.8 |
| Related income tax benefit | (0.2) | (0.2) | (0.5) | (0.7) |
| Share-based compensation expense, net of taxes | \$ 5.5 | \$ 5.6 | \$ 16.3 | \$ 19.1 |

As of September 30, 2022, unrecognized compensation cost related to stock options was \$11.9 million. Unvested outstanding stock options as of September 30, 2022 had a weighted average remaining vesting period of 0.7 years.

Stock option exercise data is summarized below (dollars in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|--|----------------------------------|---------|---------------------------------|---------|
| | 2022 | 2021 | 2022 | 2021 |
| Number of options exercised | 38,578 | 107,233 | 279,451 | 320,672 |
| Cash received | \$ 4.7 | \$ 14.0 | \$ 32.9 | \$ 42.3 |
| Total intrinsic value of options exercised | \$ 4.0 | \$ 8.0 | \$ 28.3 | \$ 17.4 |

RSUs

Each RSU entitles the recipient to one share of our common stock upon vesting. We measure the fair value of RSUs using the stock price on the date of grant. Share-based compensation expense for RSUs is recorded ratably over their vesting period.

A summary of the activity with respect to, and status of, RSUs during the nine-month period ended September 30, 2022 is presented below:

| | Number of RSUs | Weighted Average Grant Date Fair Value |
|---------------------------------------|-------------------|---|
| Unvested at January 1, 2022 | 390,539 | \$ 129.76 |
| Granted | 680,826 | 205.23 |
| Vested | (200,323) | 125.01 |
| Forfeited/canceled | (28,729) | 153.95 |
| Unvested at September 30, 2022 | 842,313 | \$ 191.06 |

Total share-based compensation expense related to RSUs is recorded as follows (in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|-------------------------------------|---------------|------------------------------------|----------------|
| | 2022 | 2021 | 2022 | 2021 |
| Cost of product sales | \$ 0.7 | \$ 0.5 | \$ 1.9 | \$ 1.5 |
| Research and development | 4.0 | 2.0 | 8.8 | 6.0 |
| Selling, general, and administrative | 5.2 | 3.7 | 12.9 | 10.9 |
| Share-based compensation expense before taxes | 9.9 | 6.2 | 23.6 | 18.4 |
| Related income tax benefit | (2.4) | (1.5) | (5.7) | (4.4) |
| Share-based compensation expense, net of taxes | \$ 7.5 | \$ 4.7 | \$ 17.9 | \$ 14.0 |

As of September 30, 2022, unrecognized compensation cost related to the grant of RSUs was \$143.2 million. Unvested outstanding RSUs as of September 30, 2022 had a weighted average remaining vesting period of 4.0 years.

STAP Awards

STAP awards convey the right to receive in cash an amount equal to the appreciation of our common stock, which is measured as the increase in the closing price of our common stock between the dates of grant and exercise. STAP awards expire on the tenth anniversary of the grant date, and in most cases, they vest in equal increments on each anniversary of the grant date over a four-year period. We discontinued the issuance of STAP awards in June 2015.

The aggregate liability balance associated with outstanding STAP awards was \$60.1 million and \$102.4 million at September 30, 2022 and December 31, 2021, respectively, all of which was classified as a current liability in our consolidated balance sheets.

Estimating the fair value of STAP awards requires the use of certain inputs that can materially impact the determination of fair value and the amount of compensation expense we recognize. Inputs used in estimating fair value include the price of our common stock, the expected volatility of the price of our common stock, the risk-free interest rate, the expected term of STAP awards, and the expected dividend yield. The fair value of the STAP awards is measured at the end of each financial reporting period because the awards are settled in cash.

The table below includes the weighted average assumptions used to measure the fair value of the outstanding STAP awards:

| | September 30, 2022 | September 30, 2021 |
|------------------------------------|--------------------|--------------------|
| Expected term of awards (in years) | 1.0 | 1.4 |
| Expected volatility | 31.2 % | 33.1 % |
| Risk-free interest rate | 4.1 % | 0.1 % |
| Expected dividend yield | — % | — % |

The closing price of our common stock was \$209.38 and \$184.58 on September 30, 2022 and September 30, 2021, respectively. The closing price of our common stock was \$216.08 on December 31, 2021.

Part I. Financial Information

A summary of the activity and status of STAP awards during the nine-month period ended September 30, 2022 is presented below:

| | Number of Awards | Weighted Average Exercise Price | Weighted Average Remaining Contractual Term (in Years) | Aggregate Intrinsic Value (in millions) |
|--|------------------|---------------------------------|--|---|
| Outstanding at January 1, 2022 | 1,093,560 | \$ 123.89 | | |
| Granted | — | — | | |
| Exercised | (357,396) | 104.61 | | |
| Forfeited/canceled | (354) | 148.82 | | |
| Outstanding at September 30, 2022 | 735,810 | \$ 133.24 | 2.0 | \$ 56.0 |
| Exercisable at September 30, 2022 | 725,810 | \$ 134.35 | 2.0 | \$ 54.4 |
| Unvested at September 30, 2022 | 10,000 | \$ 52.57 | 0.2 | \$ 1.6 |

Share-based compensation (benefit) expense recognized in connection with STAP awards is as follows (in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|----------------------------------|----------------|---------------------------------|----------------|
| | 2022 | 2021 | 2022 | 2021 |
| Cost of product sales | \$ (0.5) | \$ 0.4 | \$ 0.2 | \$ 2.3 |
| Research and development | (2.4) | 3.5 | 3.1 | 10.1 |
| Selling, general, and administrative | (15.6) | 8.3 | (3.1) | 41.9 |
| Share-based compensation (benefit) expense before taxes | (18.5) | 12.2 | 0.2 | 54.3 |
| Related income tax expense (benefit) | 3.3 | (1.5) | (0.6) | (9.0) |
| Share-based compensation (benefit) expense, net of taxes | \$ (15.2) | \$ 10.7 | \$ (0.4) | \$ 45.3 |

Cash paid to settle STAP awards exercised during the nine-month periods ended September 30, 2022 and September 30, 2021 was \$42.3 million and \$67.6 million, respectively.

ESPP

The ESPP provides eligible employees with the right to purchase shares of our common stock at a discount through elective accumulated payroll deductions at the end of each offering period. Eligible employees may contribute up to 15 percent of their base salary, subject to certain annual limitations as defined in the ESPP. The purchase price of the shares is equal to the lower of 85 percent of the closing price of our common stock on either the first or last trading day of a given offering period. In addition, the ESPP provides that no eligible employee may purchase more than 4,000 shares during any offering period. The ESPP expires in June 2032 and limits the aggregate number of shares that can be issued under the ESPP to 3.0 million.

10. Earnings Per Common Share

Basic earnings per common share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per common share is computed by dividing net income by the weighted average number of shares of common stock outstanding during the period, adjusted for the potential dilutive effect of our outstanding stock options, RSUs, and shares issuable under the ESPP, as if they were vested and, in the case of stock options, exercised.

Basic and diluted earnings per common share are computed independently for each quarter and any year-to-date period presented. The sum of the quarters' earnings per common share may not equal the earnings per common share for any year-to-date period due to rounding.

The components of basic and diluted earnings per common share comprised the following (in millions, except per share amounts):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---|-------------------------------------|-------------|------------------------------------|-------------|
| | 2022 | 2021 | 2022 | 2021 |
| Numerator: | | | | |
| Net income | \$ 239.3 | \$ 162.7 | \$ 595.2 | \$ 363.6 |
| Denominator: | | | | |
| Weighted average outstanding shares — basic | 45.5 | 44.9 | 45.3 | 44.8 |
| Effect of dilutive securities ⁽¹⁾ : | | | | |
| Stock options, RSUs, and ESPP ⁽²⁾ | 3.2 | 2.7 | 2.9 | 2.3 |
| Weighted average shares — diluted⁽²⁾ | 48.7 | 47.6 | 48.2 | 47.1 |
| Net income per common share: | | | | |
| Basic | \$ 5.26 | \$ 3.62 | \$ 13.14 | \$ 8.12 |
| Diluted | \$ 4.91 | \$ 3.42 | \$ 12.35 | \$ 7.72 |
| Stock options and RSUs excluded from calculation⁽²⁾ | — | — | — | 0.1 |

(1) Calculated using the treasury stock method.

(2) The common shares underlying certain stock options and RSUs have been excluded from the computation of diluted earnings per share because their impact would be anti-dilutive.

11. Income Taxes

Our effective income tax rate (**ETR**) for the nine months ended September 30, 2022 and 2021 was 23 percent and 20 percent, respectively. Our ETR for the nine months ended September 30, 2022 increased compared to the ETR for the nine months ended September 30, 2021 primarily due to an increase in the valuation allowance in the current period compared to a decrease in the prior period.

We record interest and penalties related to uncertain tax positions as a component of income tax expense. As of September 30, 2022 and December 31, 2021, our total liability for unrecognized tax benefits, including related interest, was approximately \$4.7 million and \$3.9 million, respectively. The total amount of unrecognized tax benefits relating to our tax positions is subject to change based on future events and it is reasonably possible that the balance could change significantly over the next 12 months. Given the uncertainty of future events, we are unable to reasonably estimate the range of possible adjustments to our unrecognized tax benefits.

On August 16, 2022, the Inflation Reduction Act (**IRA**) was enacted. The IRA includes a 15% corporate minimum tax and adjustments to certain energy-related tax credits and incentives. We currently do not expect the tax-related provisions of the IRA to have a material impact on our consolidated financial statements, including our annual ETR.

12. Segment Information

We operate as one operating segment with a focus on the development and commercialization of products to address the unmet needs of patients with chronic and life-threatening conditions. Our Chief Executive Officer, as our chief operating decision maker, manages and allocates resources to the operations of our company on a consolidated basis. This enables our Chief Executive Officer to assess our overall level of available resources and determine how best to deploy these resources across functions, therapeutic areas, and research and development projects in line with our long-term company-wide strategic goals.

Part I. Financial Information

Net product sales, cost of product sales, and gross profit for each of our commercial products were as follows (in millions):

| 2022 | Three Months Ended September 30, | | | | | |
|-----------------------|----------------------------------|--------------------------|----------------|----------------|---------------|-----------------|
| | Tyvaso ⁽¹⁾ | Remodulin ⁽²⁾ | Orenitram | Unituxin | Adcirca | Total |
| Net product sales | \$ 257.7 | \$ 114.0 | \$ 87.5 | \$ 46.1 | \$ 10.7 | \$ 516.0 |
| Cost of product sales | 17.0 | 7.5 | 5.6 | 2.7 | 4.4 | 37.2 |
| Gross profit | \$ 240.7 | \$ 106.5 | \$ 81.9 | \$ 43.4 | \$ 6.3 | \$ 478.8 |

| 2021 | Tyvaso ⁽¹⁾ | Remodulin ⁽²⁾ | Orenitram | Unituxin | Adcirca | Total |
|-----------------------|-----------------------|--------------------------|----------------|----------------|---------------|-----------------|
| Net product sales | \$ 164.2 | \$ 125.4 | \$ 85.2 | \$ 55.3 | \$ 14.6 | \$ 444.7 |
| Cost of product sales | 7.8 | 6.9 | 4.5 | 2.4 | 6.1 | 27.7 |
| Gross profit | \$ 156.4 | \$ 118.5 | \$ 80.7 | \$ 52.9 | \$ 8.5 | \$ 417.0 |

| 2022 | Nine Months Ended September 30, | | | | | |
|-----------------------|---------------------------------|--------------------------|-----------------|-----------------|----------------|-------------------|
| | Tyvaso ⁽¹⁾ | Remodulin ⁽²⁾ | Orenitram | Unituxin | Adcirca | Total |
| Net product sales | \$ 630.7 | \$ 377.7 | \$ 249.3 | \$ 146.2 | \$ 30.9 | \$ 1,434.8 |
| Cost of product sales | 29.7 | 23.3 | 17.2 | 9.5 | 13.1 | 92.8 |
| Gross profit | \$ 601.0 | \$ 354.4 | \$ 232.1 | \$ 136.7 | \$ 17.8 | \$ 1,342.0 |

| 2021 | Tyvaso ⁽¹⁾ | Remodulin ⁽²⁾ | Orenitram | Unituxin | Adcirca | Total |
|-----------------------|-----------------------|--------------------------|-----------------|-----------------|----------------|-------------------|
| Net product sales | \$ 441.0 | \$ 395.4 | \$ 233.8 | \$ 152.3 | \$ 47.8 | \$ 1,270.3 |
| Cost of product sales | 20.6 | 23.5 | 12.4 | 11.0 | 20.4 | 87.9 |
| Gross profit | \$ 420.4 | \$ 371.9 | \$ 221.4 | \$ 141.3 | \$ 27.4 | \$ 1,182.4 |

(1) Net product sales and cost of product sales include both the drug product and the respective inhalation devices for both Tyvaso and Tyvaso DPI.

(2) Net product sales and cost of product sales include sales of infusion devices, such as the Remunity Pump.

Geographic revenues are determined based on the country in which our customers (distributors) are located. Total revenues from external customers by geographic area are as follows (in millions):

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|------------------------------|----------------------------------|-----------------|---------------------------------|-------------------|
| | 2022 | 2021 | 2022 | 2021 |
| United States | \$ 500.2 | \$ 412.1 | \$ 1,350.4 | \$ 1,178.1 |
| Rest of World ⁽¹⁾ | 15.8 | 32.6 | 94.4 | 92.2 |
| Total⁽¹⁾ | \$ 516.0 | \$ 444.7 | \$ 1,444.8 | \$ 1,270.3 |

(1) Includes other revenue of \$10.0 million for the nine months ended September 30, 2022, reflecting an up-front payment from an international distributor.

We recorded revenue from three distributors in the United States that exceeded ten percent of total revenues. Revenue from these three distributors as a percentage of total revenues is as follows:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---------------|----------------------------------|------|---------------------------------|------|
| | 2022 | 2021 | 2022 | 2021 |
| Distributor 1 | 55 % | 49 % | 52 % | 50 % |
| Distributor 2 | 31 % | 30 % | 31 % | 28 % |
| Distributor 3 | 8 % | 10 % | 9 % | 11 % |

13. Litigation

Sandoz Antitrust Litigation

On April 16, 2019, Sandoz Inc. (**Sandoz**) and its marketing partner RareGen, LLC (now known as Liquidia PAH, LLC, a subsidiary of Liquidia Corporation) (**RareGen**), filed a complaint in the U.S. District Court for the District of New Jersey against us and Smiths Medical ASD, Inc. (**Smiths Medical**), alleging that we and Smiths Medical engaged in anticompetitive conduct in connection with

plaintiffs' efforts to launch their generic version of Remodulin. In particular, the complaint alleged that we and Smiths Medical unlawfully impeded competition by entering into an agreement to produce CADD-MS[®]3 cartridges specifically for the delivery of subcutaneous Remodulin for our patients, without making these cartridges available for the delivery of Sandoz's generic version of Remodulin. On March 30, 2020, the plaintiffs filed an amended complaint to add a count alleging that we breached our earlier patent settlement agreement with Sandoz by refusing to grant Sandoz access to cartridges purchased for our patients.

Smiths Medical was dismissed from the case in November 2020, based on a settlement resolving the disputes between the plaintiffs and Smiths Medical. As part of this settlement, Smiths Medical paid the plaintiffs \$4.25 million, disclosed and made available to the plaintiffs certain specifications and other information related to the MS-3 cartridges, and granted to the plaintiffs a non-exclusive, royalty-free license in the United States to Smiths Medical's patents and copyrights associated with the MS-3 cartridges and certain other information related to the MS-3 pumps and cartridges.

On March 30, 2022, the court granted our motion for summary judgment with respect to all claims brought by the plaintiffs except the breach of contract claim. As a result, all antitrust claims, all claims under state competition laws, and the common law tortious interference claim have been resolved in our favor. These were the only claims in the case that gave rise to any potential for treble damages, punitive damages, and/or the award of attorneys' fees. The court also denied plaintiffs' request for injunctive relief.

The court granted Sandoz's motion for summary judgment with respect to Sandoz's breach of contract claim. The issue of what, if any, damages Sandoz is entitled to based on the contract claim will proceed to trial. RareGen has no claim for breach of contract and, as a result, has no remaining claims in the litigation. The case will now proceed to trial with respect to damages under the breach of contract claim. The court has not yet set a date for trial. The parties will have the right to appeal the summary judgment decisions upon entry of final judgment following the trial.

We intend to continue to vigorously defend this litigation. Among other things, we believe that plaintiffs, who were on notice that Smiths Medical would discontinue the CADD MS-3 delivery system, failed to fulfill their duty to properly mitigate their exposure as a result of such discontinuation, thereby causing the alleged damages for which they are suing us. However, due to the uncertainty inherent in any litigation, we cannot guarantee that an adverse outcome will not result. Any litigation of this nature could involve substantial cost, and an adverse outcome could result in substantial monetary damages. We currently are not able to reasonably estimate a range of potential losses due to the number of variables that may affect the outcome of the damages trial and any potential appeals, including potential damages amounts sought, the strength of our defenses, the variety of potential legal and factual determinations yet to be made by the court, the rulings that may be subject to appeal, and the inherent unpredictability of any outcome associated with these issues.

Litigation with Liquidia Technologies, Inc.

On March 30, 2020, Liquidia Technologies, Inc. (**Liquidia**) filed two petitions for *inter partes* review (**IPR**) with the Patent Trial and Appeal Board (**PTAB**) of the U.S. Patent and Trademark Office (**USPTO**). In its petitions, Liquidia sought to invalidate U.S. Patent Nos. 9,604,901 (the '**901 patent**') and 9,593,066 (the '**066 patent**'), both of which relate to a method of making treprostinil, the active pharmaceutical ingredient in Tyvaso, Tyvaso DPI, Remodulin, and Orenitram. These patents were issued in March 2017 and are listed in the FDA's Approved Drug Products with Therapeutic Equivalence Evaluations publication, also known as the Orange Book, for Tyvaso, Tyvaso DPI, Remodulin, and Orenitram. In October 2020, the PTAB declined to institute IPR proceedings on the '066 patent because Liquidia failed to establish a reasonable likelihood of prevailing on any claim relating to the '066 patent. The PTAB instituted IPR proceedings on the '901 patent in October 2020 and issued a final written decision in October 2021. The final written decision found that Liquidia had proven the invalidity of seven of the claims of the '901 patent but failed to prove the invalidity of two other claims. The parties have each appealed the portions of the final written decision adverse to them, and those appeals are pending. No cancellation of claims takes effect until resolution of any appeals.

In January 2020, Liquidia submitted an NDA to the FDA for approval of Yutrepia, a dry powder inhalation formulation of treprostinil, to treat pulmonary arterial hypertension (**PAH**). This NDA was submitted under the 505(b)(2) regulatory pathway with Tyvaso as the reference listed drug. In November 2021, the FDA granted tentative approval of Liquidia's NDA.

In April 2020, we received a Paragraph IV Certification Notice Letter (**Notice Letter**) from Liquidia, stating that it intends to market Yutrepia before the expiration of all patents listed in the Orange Book for Tyvaso. The Notice Letter states that Liquidia's NDA for Yutrepia contains a Paragraph IV certification alleging that these patents are not valid, not enforceable, and/or will not be infringed by the commercial manufacture, use, or sale of Yutrepia.

On June 4, 2020, we filed a lawsuit in the U.S. District Court for the District of Delaware against Liquidia for infringement of the '901 patent and the '066 patent, both of which expire in December 2028. We filed our lawsuit within 45 days of receipt of notice from Liquidia of its NDA filing. As a result, under the Hatch-Waxman Act, the FDA was precluded by regulation from approving Liquidia's NDA for up to 30 months or until the resolution of the litigation, whichever occurs first. In July 2020, Liquidia filed an answer to our complaint that included counterclaims alleging, among other things, that the patents at issue in the litigation are not valid and will not be infringed by the commercial manufacture, use, or sale of Yutrepia.

In July 2020, the USPTO issued a new patent to us related to Tyvaso. The new patent, U.S. Patent No. 10,716,793 (the '**793 patent**'), expires in May 2027, and is listed in the Orange Book for Tyvaso and Tyvaso DPI. In July 2020, we filed an amended complaint against Liquidia to include a claim for infringement of the '793 patent. The '793 patent relates to a method of administering treprostinil via inhalation and includes claims covering the dosing regimen used to administer Tyvaso and Tyvaso DPI. In

Part I. Financial Information

December 2021, we filed a stipulation that the '901 patent is not infringed by Liquidia based on the court's claim construction ruling. That stipulation is subject to our right to appeal the court's claim construction.

Trial took place during March 2022, and the court issued its decision on August 31, 2022. The court found that Liquidia infringed the '793 patent and had not proved that any claim of that patent is invalid. The court also determined that Liquidia had proved invalidity of certain claims of the '066 patent and that we had not proved infringement of another '066 patent claim. Accordingly, the court issued a final judgment that bars the FDA from approving Liquidia's approved product until expiration of the '793 patent in May 2027. The parties have appealed the portions of the decision adverse to each of them, and those appeals are pending. Meanwhile, Liquidia filed a motion with the district court seeking to stay the portion of the judgment that bars the FDA from finally approving until expiration of the '793 patent, and we opposed that motion. The court has not yet ruled on that motion.

In January 2021, Liquidia filed another petition for IPR with the PTAB. In its petition, Liquidia sought to invalidate the '793 patent. In July 2022, the PTAB issued a final written decision finding all claims of the '793 patent to be unpatentable. We filed a request for rehearing and for precedential opinion panel review. On October 26, 2022, the PTAB denied our precedential opinion panel review, but "determine[d] that the Board's Final Written Decision did not address adequately whether the [references relied upon as the basis for canceling claims] qualify as prior art." Thus, the PTAB directed the original panel "in its consideration on rehearing, to clearly identify whether the ... references qualify as prior art." There is no deadline to complete this inquiry. Once the PTAB issues its decision, the losing party will have the right to appeal. The patent remains valid at least until appeals are exhausted.

Liquidia could obtain final FDA approval for its proposed product prior to May 2027 in two circumstances: (1) Liquidia could prevail on appeal, either from the district court judgment or IPRs, such that it is not found to infringe any valid claims of our patents; or (2) the district court or appeals court could stay the order barring FDA approval during the pendency of its appeals.

In June 2021, we filed a motion in the patent case in the U.S. District Court for the District of Delaware to file an amended complaint adding trade secret misappropriation claims against Liquidia and a former Liquidia employee, Dr. Robert Roscigno. The court denied the motion based on a finding that adding the additional claims would impact the case schedule. Thus, we filed those claims as a separate case against Liquidia and Robert Roscigno in North Carolina state court. Discovery is underway in that case.

We plan to vigorously enforce our intellectual property rights related to Tyvaso and Tyvaso DPI.

MSP Recovery Litigation

On July 27, 2020, MSP Recovery Claims, Series LLC; MSPA Claims 1, LLC; and Series PMPI, a designated series of MAO-MSO Recovery II, LLC filed a "Class Action Complaint" against Caring Voices Coalition, Inc. (**CVC**) and us in the U.S. District Court for the District of Massachusetts. The complaint alleged that we violated the federal Racketeer Influenced and Corrupt Organizations act and various state laws by coordinating with CVC when making donations to a PAH fund so that those donations would go towards copayment obligations for Medicare patients taking drugs manufactured and marketed by us. Plaintiffs claim to have received assignments from various Medicare Advantage health plans and other insurance entities that allow them to bring this lawsuit on behalf of those entities to recover allegedly inflated amounts they paid for our drugs. In April 2021, the court granted our motion to transfer the case to the U.S. District Court for the Southern District of Florida. Two members of the putative class, Humana Inc. and UnitedHealthcare Insurance Company, have informed us that they may bring claims directly against us to recover alleged overpayments.

In October 2021, we filed a motion for judgment on the pleadings, seeking to dismiss the plaintiffs' claims in this litigation. On that same day, plaintiffs filed an amended complaint that includes state antitrust claims based on alleged facts similar to those raised by Sandoz and RareGen in the matter described above. The amended complaint added MSP Recovery Claims Series 44, LLC as a plaintiff and Smiths Medical and CVC as defendants. As a result of the amended complaint, the court ruled that our motion for judgment on the pleadings was moot. In December 2021, we filed a motion to dismiss all of the plaintiffs' claims in the amended complaint, including the new antitrust claims. Smiths Medical also filed a motion to dismiss the plaintiffs' claims against Smiths Medical. On September 23, 2022, the court dismissed all of the plaintiffs' claims against us and Smiths Medical without prejudice.

On October 21, 2022, the plaintiffs filed a motion seeking clarification or reconsideration of the court's order dismissing the complaint without prejudice and argued that the court should allow the plaintiffs an opportunity to amend. That same day, the plaintiffs filed a motion for leave to amend the complaint and attached a proposed second amended complaint. In addition to the claims previously asserted, the proposed second amended complaint adds federal antitrust claims and consumer protection claims under other states' laws. The second amended complaint also names Accredo Health Group, CVS Health Corporation, Express Scripts, Inc., Express Scripts Holding Company, and the Adira Foundation as additional defendants. On October 27, 2022, the court granted plaintiffs' motion for leave to amend, and denied as moot plaintiffs' motion seeking clarification. On that same day, plaintiffs filed the second amended complaint.

We intend to vigorously defend against this lawsuit and any similar lawsuits that may be brought by these or any other plaintiffs.

340B Program Litigation

We participate in the Public Health Service's 340B drug pricing program (the **340B program**), through which we sell our products at discounted prices to covered entities, including through pharmacies that have contracts with such covered entities (**340B contract pharmacies**). Increasing use of 340B contract pharmacies, coupled with a lack of oversight and transparency, has resulted in increased risks of 340B statutory violations related to the diversion of 340B-purchased drugs to individuals who are not patients of the 340B covered entity, and to prohibited "duplicate discounts" when 340B-purchased drugs are also billed to Medicaid. In November 2020, we notified the U.S. Health Resources and Services Administration (**HRSA**) that we would begin implementing narrowly-tailored 340B contract pharmacy policies with the goal of stemming abuses of the 340B program without upsetting the status quo or creating hardship for covered entities or their patients. At around the same time, a number of other manufacturers also announced their own policies aimed at stemming 340B program abuses.

In December 2020, the U.S. Department of Health and Human Services (**HHS**) General Counsel issued a non-binding Advisory Opinion (the **Advisory Opinion**) concluding that, among other things, pharmaceutical manufacturers are obligated to sell their drugs at the 340B discounted price to an unlimited number of 340B contract pharmacies. In May 2021, HRSA sent a letter to us stating that our 340B contract pharmacy policies violated the 340B statute. HRSA also sent materially similar letters to five other pharmaceutical manufacturers. We responded to that letter by clarifying our policies and requesting additional information from HRSA. To date, HRSA has not responded.

The federal government's pronouncements regarding the use of 340B contract pharmacies have triggered a variety of litigation. In one of those cases, the court concluded that the Advisory Opinion was "legally flawed," and in response HHS withdrew the Advisory Opinion. Notwithstanding the withdrawal of the Advisory Opinion, HRSA has made clear that it is not withdrawing its May 2021 letter to us and the threat of enforcement action.

In June 2021, we commenced litigation against HRSA and HHS in the U.S. District Court for the District of Columbia seeking to vindicate the lawfulness of our 340B program contract pharmacy policies. Despite the litigation, in September 2021, HRSA sent to us, along with the other manufacturers challenging HRSA's 340B interpretation, letters stating that HRSA is referring "this issue to the HHS Office of the Inspector General (**OIG**)" for potential enforcement action. We have not received any communication from the OIG regarding our 340B contract pharmacy policy. Meanwhile, the parties submitted and fully briefed cross-motions for summary judgment, and the court heard oral argument on those motions, and also similar motions in a related case involving Novartis, in October 2021. In November 2021, the court granted our motion for summary judgment in part, and issued a decision holding that the HRSA letters threatening enforcement action "contain legal reasoning that rests upon an erroneous reading of Section 340B." The court explained that "[t]he statute's plain language, purpose, and structure do not prohibit drug manufacturers from attaching any conditions to the sales of covered drugs through contract pharmacies. Nor do they permit all conditions. Accordingly, any future enforcement action must rest on a new statutory provision, a new legislative rule, or a well-developed legal theory that Section 340B precludes the specific conditions at issue here."

HRSA and HHS appealed to the U.S. Court of Appeals for the District of Columbia Circuit in December 2021, and the appeal is pending. Oral argument took place on October 24, 2022, and the parties await the court's decision.

Litigation involving other manufacturers is also moving forward in parallel with our case, and some of the decisions issued in those cases have reached different conclusions regarding HRSA's and HHS's interpretation of the 340B statute than our case.

We intend to vigorously defend our 340B program contract pharmacy policies.

14. Priority Review Voucher

In December 2020, we entered into an agreement to acquire a rare pediatric disease priority review voucher for \$105.0 million. In January 2021, we closed the transaction and expensed the \$105.0 million within *research and development* in our consolidated statements of operations for the first quarter of 2021. We redeemed the voucher in connection with our submission of the NDA for Tyvaso DPI in April 2021.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2021 (the **2021 Annual Report**), and our consolidated financial statements and accompanying notes included in *Part I, Item 1* of this Quarterly Report on Form 10-Q. All statements in this filing are made as of the date this Quarterly Report on Form 10-Q is filed with the U.S. Securities and Exchange Commission (**SEC**). We undertake no obligation to publicly update or revise these statements, whether as a result of new information, future events or otherwise.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of this report contain forward-looking statements made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934 (the **Exchange Act**) and the Private Securities Litigation Reform Act of 1995. These statements, which are based on our beliefs and expectations about future outcomes and on information available to us through the date this Quarterly Report on Form 10-Q is filed with the SEC, include, among others, statements related to the following:

- The potential impact of the COVID-19 pandemic on our business, results of operations, liquidity, and operations, and our ability to mitigate this potential impact;
- Expectations of revenues, expenses, profitability, cash flows, and growth in the number of patients being treated with our products, including anticipated growth in the number of Tyvaso patients as a result of the expansion of its label to include pulmonary hypertension associated with interstitial lung disease (**PH-ILD**) and anticipated growth in revenues following the recent launch of Tyvaso DPI;
- The sufficiency of our cash on hand to support operations;
- Our ability to obtain financing on terms favorable to us or at all;
- Our ability to obtain and maintain domestic and international regulatory approvals;
- Our ability to maintain attractive pricing and reimbursement levels for our products, in light of increasing competition, including from generic products, pressure from government and other payers to decrease the costs associated with healthcare, including the potential impact of the Inflation Reduction Act on our business;
- The expected volume and timing of sales of our commercial products, as well as potential future commercial products, including the anticipated effect of various research and development efforts on sales of these products;
- The timing and outcome of clinical studies, other research and development efforts, and related regulatory filings and approvals;
- The outcome of pending and potential future legal and regulatory actions by the U.S. Food and Drug Administration (**FDA**) and other regulatory and government enforcement agencies, and the anticipated duration of regulatory exclusivity for our products;
- The timing and outcome of ongoing litigation, including the lawsuit filed against us by Sandoz, Inc. (**Sandoz**) and Liquidia PAH, LLC (formerly known as RareGen, LLC) (**RareGen**); our patent and trade secret litigation with Liquidia Technologies, Inc. (**Liquidia**) related to its new drug application (**NDA**) for Yutrepia; our litigation with MSP Recovery Claims, Series LLC, and related entities; and our litigation with the U.S. Department of Health and Human Services (**HHS**) and the U.S. Health Resource Services Administration (**HRSA**) related to the Public Health Service's 340B drug pricing program (the **340B program**);
- The impact of competing therapies on sales of our commercial products, including the impact of generic versions of Adcirca and Remodulin; established therapies such as Uptravi; and newly-developed therapies such as Merck's sotatercept and Liquidia's Yutrepia;
- The expectation that we will be able to manufacture sufficient quantities and maintain adequate inventories of our commercial products, through both our in-house manufacturing capabilities and third-party manufacturing sites, and our ability to obtain and maintain related approvals by the FDA and other regulatory agencies;
- The adequacy of our intellectual property protection and the validity and expiration dates of the patents we own or license, as well as the regulatory exclusivity periods for our products;
- The effect of our recent conversion to a Delaware public benefit corporation (**PBC**);
- Any statements that include the words "believe," "seek," "expect," "anticipate," "forecast," "project," "intend," "estimate," "should," "could," "may," "will," "plan," or similar expressions; and
- Other statements contained or incorporated by reference in this report that are not historical facts.

We caution you that these statements are not guarantees of future performance and are subject to numerous evolving risks and uncertainties that we may not be able to accurately predict or assess, and that may cause our actual results to differ materially from anticipated results, including the risks and uncertainties we describe in *Part II, Item 1A—Risk Factors* of this Quarterly Report on Form 10-Q; factors described in our 2021 Annual Report, under the section entitled *Part I, Item 1A—Risk Factors*, and factors described in other cautionary statements, cautionary language, and risk factors set forth in our other filings with the SEC.

Overview of Marketed Products

We market and sell the following commercial products:

- *Tyvaso*, an inhaled formulation of the prostacyclin analogue treprostinil, approved by the FDA and regulatory authorities in Argentina and Israel to improve exercise ability in patients with pulmonary arterial hypertension (**PAH**). Tyvaso was also approved by the FDA in March 2021 to improve exercise ability in patients with PH-ILD. In May 2022, we also obtained FDA approval of Tyvaso DPI to treat PAH and PH-ILD, and we initiated commercial shipments of Tyvaso DPI to our distributors in June 2022.
- *Remodulin*, a continuously-infused formulation of treprostinil, approved by the FDA for subcutaneous and intravenous administration to diminish symptoms associated with exercise in patients with PAH. Remodulin has also been approved in various countries outside of the United States. In February 2021, we launched U.S. sales of the Remunity Pump, a new subcutaneous delivery system for Remodulin.
- *Orenitram*, a tablet dosage form of treprostinil, approved by the FDA to delay disease progression and improve exercise capacity in PAH patients. In April 2022, an international distributor submitted a marketing approval application for Orenitram to the European Medicines Agency. In October 2022, this application was withdrawn by the distributor based on initial feedback indicating that approval of Orenitram in Europe would require another large clinical trial.
- *Unituxin*, a monoclonal antibody approved in the United States, Canada, and Japan for treatment of high-risk neuroblastoma.
- *Adcirca*, an oral PDE-5 inhibitor approved by the FDA to improve exercise ability in PAH patients.

Revenues

Our net product sales consist of sales of the commercial products noted above, together with associated sales of delivery devices (in the case of Remodulin, Tyvaso, and Tyvaso DPI), and up-front and milestone payments by our distributors. We have entered into separate, non-exclusive distribution agreements with Accredo Health Group, Inc. and its affiliates (**Accredo**) and Caremark, L.L.C. (**CVS Specialty**) to distribute Tyvaso, Tyvaso DPI, Remodulin, the Remunity Pump, and Orenitram in the United States, and we have entered into an exclusive distribution agreement with ASD Specialty Healthcare, Inc., an affiliate of AmerisourceBergen Corporation, to distribute Unituxin in the United States. We also sell Tyvaso, Remodulin, and Unituxin to distributors internationally. We sell Adcirca through the pharmaceutical wholesale network of Eli Lilly and Company (**Lilly**). To the extent we have increased the price of any of these products, increases have typically been in the single-digit percentages per year, except for Adcirca, the price of which is set solely by Lilly.

We require our specialty pharmaceutical distributors to maintain reasonable levels of inventory reserves for our treprostinil-based therapies because the interruption of these therapies can be life threatening. Our specialty pharmaceutical distributors typically place monthly orders based on current utilization trends and contractual minimum and maximum inventory requirements. As a result, sales of our treprostinil-based therapies can vary depending on the timing and magnitude of these orders and do not precisely reflect changes in patient demand.

Generic Competition and Challenges to our Intellectual Property Rights

Remodulin—Generic Competition

We settled litigation with Sandoz related to its abbreviated new drug application (**ANDA**) seeking FDA approval to market a generic version of Remodulin and in March 2019, Sandoz announced the availability of its generic product in the United States. We have also entered into similar settlement agreements with other generic companies, some of which have also launched sales of generic versions of Remodulin. Through September 30, 2022, we have seen limited erosion of Remodulin sales as a result of generic treprostinil competition in the United States. We are currently engaged in litigation with Sandoz and its marketing partner, RareGen (now a subsidiary of Liquidia Corporation, the parent company of Liquidia), related to the infusion devices used to deliver Remodulin subcutaneously. We understand that generic treprostinil was initially launched by Sandoz/RareGen for use only by intravenous administration. In May 2021, Liquidia announced that Sandoz's generic treprostinil has been made available for subcutaneous use, following FDA clearance of a cartridge that can deliver the product via the Smiths Medical MS-3 pump. See Note 13—*Litigation*, to our consolidated financial statements included in this Quarterly Report on Form 10-Q.

Regulatory authorities in various European countries began approving generic versions of Remodulin in 2018, followed by pricing approvals and launches in most of these countries in 2019 and 2020. As a result, our international Remodulin revenues have come under pressure due to increased competition and a reduction in our contractual transfer price for Remodulin sold by certain international distributors for sales in countries in which the pricing of Remodulin is impacted by the generic competition.

Part I. Financial Information

Tyvaso and Orenitram—Potential Future Generic Competition

We settled litigation with Watson Laboratories, Inc. (**Watson**) and Actavis Laboratories FL, Inc. (**Actavis**) related to their ANDAs seeking FDA approval to market generic versions of Tyvaso and Orenitram, respectively, before the expiration of certain of our U.S. patents. Under the settlement agreements, Watson and Actavis can market their generic versions of Tyvaso and Orenitram in the United States beginning in January 2026 and June 2027, respectively, although they may be permitted to enter the market earlier under certain circumstances. In May 2022, we settled litigation with ANI Pharmaceuticals, Inc. (**ANI**) regarding its ANDA seeking FDA approval to market a generic version of Orenitram. Under the settlement agreements, ANI can market its generic version of Orenitram in the United States beginning in December 2027, although it may be permitted to enter the market earlier under certain circumstances. Competition from these generic companies could reduce our net product sales and profits.

Liquidia—Yutrepia

We are engaged in patent litigation with Liquidia concerning three patents related to Tyvaso. The litigation is proceeding in parallel in two fora: (1) federal court; and (2) the Patent Trial and Appeal Board (**PTAB**) of the U.S. Patent and Trademark Office.

As background, in January 2020 Liquidia submitted its initial NDA to the FDA for approval of Yutrepia™ (formerly known as LIQ861), a dry powder formulation of treprostinil for inhalation. The Yutrepia NDA was submitted under the 505(b)(2) regulatory pathway with Tyvaso as the reference listed drug and received tentative approval from the FDA in November 2021. If and when Liquidia launches Yutrepia, it would compete directly with Tyvaso, Tyvaso DPI, and our other treprostinil-based products.

Following the initial submission of the Yutrepia NDA, we filed a lawsuit in federal district court against Liquidia for infringement of three of our patents: U.S. Patent Nos. 9,604,901 (the **'901 patent**), 9,593,066 (the **'066 patent**), and 10,716,793 (the **'793 patent**). In December 2021, we filed a stipulation that the '901 patent is not infringed by Liquidia based on the court's claim construction ruling, subject to our right to appeal the court's claim construction at the appropriate time. Trial was held during March 2022 on the '066 patent and the '793 patent, and we received the court's decision on August 31, 2022. The court found that Liquidia infringed the '793 patent and had not proved that any claim of that patent is invalid. The court also determined that Liquidia had proved invalidity of certain claims of the '066 patent and that we had not proved infringement of another '066 patent claim. Accordingly, the court issued a final judgment that bars the FDA from approving Liquidia's approved product until expiration of the '793 patent in May 2027. The parties have each appealed the portions of the decision adverse to them, and those appeals are pending.

Separately, Liquidia has been attempting to invalidate these patents by filing petitions for *inter partes* review (**IPR**) with the PTAB. Challengers in IPR proceedings have a lower burden of proof (preponderance of the evidence) relative to district court litigation (clear and convincing evidence) to successfully challenge the validity of patent claims.

- **'066 patent:** In October 2020, the PTAB declined to institute IPR proceedings relating to this patent because Liquidia failed to establish a reasonable likelihood of prevailing on any claim of this patent.
- **'901 patent:** In October 2021, the PTAB issued a final written decision on Liquidia's IPR relating to this patent. The PTAB upheld the patentability of two of the claims of this patent, one of which was being asserted against Liquidia in the district court litigation, and found that seven other claims of this patent were unpatentable. We have appealed the PTAB's decision, and the appeal is pending. All claims of this patent remain valid until any IPR appeals are exhausted. In December 2021, we filed a stipulation in the district court litigation that the '901 patent is not infringed by Liquidia based on the court's claim construction ruling. That stipulation is subject to our right to appeal the court's claim construction at the appropriate time.
- **'793 patent:** In August 2021, the PTAB instituted IPR proceedings related to this patent. In July 2022, the PTAB issued a final written decision finding all claims of this patent to be unpatentable. We filed a request for rehearing and for precedential opinion panel review. On October 26, 2022, the PTAB denied our precedential opinion panel review, but "determine[d] that the Board's Final Written Decision did not address adequately whether the [references relied upon as the basis for canceling claims] qualify as prior art." Thus, the PTAB directed the original panel "in its consideration on rehearing, to clearly identify whether the ... references qualify as prior art." There is no deadline to complete this inquiry. Once the PTAB issues its decision, the losing party will have the right to appeal. All claims of this patent remain valid until any IPR appeals are exhausted.

Liquidia could obtain final FDA approval for its proposed product prior to May 2027 in two circumstances: (1) Liquidia could prevail on appeal, either from the district court judgment or IPRs, such that it is not found to infringe any valid claims of our patents; or (2) the district court or appeals court could stay the district court order barring FDA approval during the pendency of its appeals. Liquidia has filed a motion with the district court to stay the bar against final FDA approval, and that motion is fully briefed and pending.

For further details, please see Note 13—*Litigation*, to our consolidated financial statements included in this Quarterly Report on Form 10-Q.

Adcirca—Generic Competition

A U.S. patent for Adcirca for treatment of pulmonary hypertension expired in November 2017, and FDA-conferred regulatory exclusivity expired in May 2018, leading to the launch of a generic version of Adcirca by Mylan N.V. in August 2018, and by additional companies in February 2019. Generic competition for Adcirca has had a material adverse impact on Adcirca net product sales.

General

We intend to vigorously enforce our intellectual property rights related to our products. However, we may not prevail in defending our patent rights, and additional challenges from other ANDA filers or other challengers may surface with respect to our products. Our patents could be invalidated, found unenforceable, or found not to cover one or more generic forms of our products. If any ANDA filer or filer of a 505(b)(2) NDA for a branded tadalafil product were to receive approval to sell its tadalafil product and/or prevail in any patent litigation, our affected product(s) would become subject to increased competition. Patent expiration, patent litigation, and competition from generic or other branded tadalafil manufacturers could have a significant, adverse impact on our tadalafil-based product revenues — including the anticipated revenues from new products such as Tyvaso DPI — our profits, and our stock price. These potential effects are inherently difficult to predict. For additional discussion, refer to the risk factor entitled, *Our intellectual property rights may not effectively deter competitors from developing competing products that, if successful, could have a material adverse effect on our revenues and profits*, contained in Part II, Item 1A—Risk Factors included in this Quarterly Report on Form 10-Q.

Operating Expenses

We devote substantial resources to our various clinical trials and other research and development efforts, which are conducted both internally and through third parties. From time to time, we also license or acquire additional technologies and compounds to be incorporated into our development pipeline. Our operating expenses include the costs described below.

Cost of Product Sales

Our cost of product sales primarily includes costs to manufacture our products, royalty and milestone payments under license agreements granting us rights to sell related products, direct and indirect distribution costs incurred in the sale of our products, and the costs of inventory reserves for current and projected obsolescence. These costs also include share-based compensation and salary-related expenses for direct manufacturing and indirect support personnel, quality review and release for commercial distribution, direct materials and supplies, depreciation, facilities-related expenses, and other overhead costs.

Research and Development

Our research and development expenses primarily include costs associated with the research and development of products and post-marketing research commitments. These costs also include share-based compensation and salary-related expenses for research and development functions, professional fees for preclinical and clinical studies, costs associated with clinical manufacturing, facilities-related expenses, regulatory costs, and costs associated with payments to third-party contract manufacturers before FDA approval of the relevant product. Expenses also include costs for third-party arrangements, including upfront fees and milestone payments required under license arrangements for therapies under development. We do not track fully-burdened research and development expenses by individual product candidate.

Selling, General, and Administrative

Our selling, general, and administrative expenses primarily include costs associated with the commercialization of approved products and general and administrative costs to support our operations. Selling expenses also include share-based compensation, salary-related expenses, product marketing and sales operations costs, and other costs incurred to support our sales efforts. General and administrative expenses also include our core corporate support functions such as human resources, finance, and legal, external costs to support our core business such as insurance premiums, legal fees, and other professional service fees.

Share-Based Compensation

Historically, we granted stock options under our Amended and Restated Equity Incentive Plan and awards under our Share Tracking Awards Plan (the **STAP**). Issuance of awards under both of these plans was discontinued in 2015. Currently, we grant stock options and restricted stock units under the United Therapeutics Corporation Amended and Restated 2015 Stock Incentive Plan (the **2015 Plan**), and restricted stock units under our 2019 Inducement Stock Incentive Plan (the **2019 Inducement Plan**). The grant date fair values of stock options and restricted stock units are recognized as share-based compensation expense ratably over their vesting periods.

The fair value of STAP awards and stock options is measured using inputs and assumptions under the Black-Scholes-Merton model. The fair value of restricted stock units is measured using our stock price on the date of grant. Although we no longer grant STAP awards, we had approximately 0.7 million STAP awards outstanding as of September 30, 2022. We account for STAP awards as liabilities because they are settled in cash. As such, we must re-measure the fair value of STAP awards at the end of each financial reporting period until the awards are no longer outstanding. Changes in our liability associated with outstanding STAP awards as a result of such re-measurements are recorded as adjustments to share-based compensation expense and can

Part I. Financial Information

create substantial volatility within our operating expenses from period to period. The following factors, among others, have a significant impact on the amount of share-based compensation expense recognized in connection with STAP awards from period to period: (1) volatility in the price of our common stock (specifically, increases in the price of our common stock will generally result in an increase in our liability and related compensation expense, while decreases in our stock price will generally result in a reduction in our liability and related compensation expense); and (2) decreases in the number of outstanding awards.

Research and Development

We focus most of our research and development efforts on the following pipeline programs. We also engage in a variety of additional research and development efforts, including technologies designed to increase the supply of transplantable organs and tissues and improve outcomes for transplant recipients through regenerative medicine, 3-D organ bioprinting, xenotransplantation, and *ex-vivo* lung perfusion. Please note that our expectations regarding our research and development programs are subject to the risks described above under *Overview—Impact of COVID-19 on our Business*, and below in *Part II, Item 1A—Risk Factors—Risks Related to Our Products and Our Operations—We face risks and uncertainties related to the COVID-19 pandemic, which could significantly disrupt our operations and/or business for an unknown period of time.*

Select Pipeline Programs

| Product | Mode of Delivery | Indication | Current Status STUDY NAME | Our Territory |
|------------------------------------|-------------------------|------------|--------------------------------|---|
| RemoPro™ (subcutaneous prodrug) | Continuous subcutaneous | PAH | Phase 1 | Worldwide |
| Tyvaso (treprostinil) | Inhaled | IPF | Phase 3 <i>TETON</i> studies | Worldwide |
| Ralinepag (IP receptor agonist) | Oral | PAH | Phase 3 <i>ADVANCE</i> studies | Worldwide, subject to out-licenses granted in certain Asian territories |

Remunity Pump and RemoPro

In February 2021, we launched U.S. commercial sales of the Remunity Pump, which is a semi-disposable system for subcutaneous delivery of treprostinil, developed in collaboration with DEKA Research & Development Corp. (**DEKA**) under an exclusive development and license agreement. The Remunity Pump consists of a small, lightweight, durable pump and separate controller. The Remunity Pump uses disposable cartridges filled with Remodulin, which can be connected to the pump with less patient manipulation than is typically involved in filling other currently-available subcutaneous pumps. In November 2019, we entered into a supply agreement with an affiliate of DEKA to manufacture and supply the Remunity Pump to us. Under the terms of the agreement, we reimburse all of DEKA's and its affiliates' costs to manufacture the Remunity Pump. The Remunity Pump was initially made available to patients in the United States primarily by contracted specialty pharmacies, with weekly shipments of disposable cartridges pre-filled with Remodulin. In September 2022, we launched a patient-filled version, which enables patients to receive monthly shipments of Remunity cartridges and Remodulin.

Continued adoption of the Remunity Pump is becoming increasingly important as one of the prior pumps used for subcutaneous Remodulin administration, the Smiths Medical CADD-MS®3 pump (**MS-3**), was discontinued by the manufacturer in 2015, and the existing inventory of these pumps held by specialty pharmacy distributors is nearly exhausted. When Smiths Medical announced it was discontinuing the MS-3 pump in 2015, we funded the manufacture of several thousand additional pumps and, in parallel, pursued development of the Remunity Pump to help ensure that PAH patients would not experience a delay or disruption in their Remodulin therapy.

We are conducting a series of phase 1 studies to develop a new prodrug called RemoPro, which is intended to enable subcutaneous delivery of treprostinil analog therapy without the site pain currently associated with subcutaneous Remodulin. As a prodrug, RemoPro is designed to be inactive in the subcutaneous tissue, which is intended to decrease or eliminate site pain, and to metabolize into treprostinil or a treprostinil analog once it is absorbed into the blood.

Finally, we are developing new, alternative pump systems for Remodulin, and new versions of the Remunity Pump.

Tyvaso — *TETON* studies

We are also enrolling two phase 3 studies, called *TETON 1* and *TETON 2*, of Tyvaso for the treatment of idiopathic pulmonary fibrosis (**IPF**). *TETON 1* is being conducted in the United States and Canada, and *TETON 2* is being conducted outside the United States and Canada. The primary endpoint of both studies is the change in absolute forced vital capacity (**FVC**) from baseline to week 52. The *TETON 1* study enrolled its first patient in June 2021, and the *TETON 2* study enrolled its first patient in October 2022.

The *TETON* studies were prompted by data from the *INCREASE* study of Tyvaso in PH-ILD, which demonstrated improvements in certain key parameters of lung function in pulmonary hypertension patients with fibrotic lung disease (improved absolute FVC

and reduced exacerbations of underlying lung disease). Specifically, in the *INCREASE* study, treatment with Tyvaso resulted in significant improvements in percent predicted FVC at weeks 8 and 16, with subjects having an underlying etiology of IPF showing the greatest improvement (week 8: 2.5%; $p=0.0380$ and week 16: 3.5%; $p=0.0147$). Consistent positive effects were also observed in patients with chronic hypersensitivity pneumonitis and environmental/occupational lung disease. In May 2022, data from the *INCREASE* open-label, long-term extension trial were presented at a medical conference, indicating that improvements in FVC were sustained for at least 64 weeks for IPF patients. For those patients who received placebo during the *INCREASE* study, marked improvements in FVC were observed following transition to active Tyvaso during the open-label extension study. These data points, combined with substantial preclinical evidence of antifibrotic activity of treprostinil, suggest that Tyvaso may offer a treatment option for patients with IPF.

In December 2020, the FDA granted orphan designation for treprostinil to treat IPF. In March 2022, the European Medicines Agency also granted orphan designation for treprostinil to treat IPF.

If the *TETON* studies are successful, we also plan to seek FDA approval to expand the Tyvaso DPI label to include IPF.

Tyvaso DPI

On May 24, 2022, the FDA approved our dry power formulation of inhaled treprostinil called Tyvaso DPI for treatment of PAH and PH-ILD. We developed this product under an in-license from MannKind Corporation (**MannKind**), and launched this product commercially in the United States in June 2022. Tyvaso DPI incorporates the dry powder formulation technology and Dreamboat[®] inhalation device technology used in MannKind's Afrezza[®] (insulin human) Inhalation Powder product, which was approved by the FDA in 2014. We believe that this new inhaled treprostinil therapy provides substantial lifestyle benefits to PAH and PH-ILD patients, as compared with nebulized Tyvaso Inhalation Solution therapy, because it is: (1) less time consuming to administer and easier to maintain, as the device is provided in pre-filled, single use, disposable cassettes, eliminating the need for cleaning and filling; and (2) mobile and more convenient, as the compact design of the inhaler and drug cassettes used with Tyvaso DPI enables the device to easily fit into the patient's pocket and the device does not require electricity to function.

We completed two clinical studies of Tyvaso DPI. One was a study in healthy volunteers, comparing the pharmacokinetics of Tyvaso DPI to Tyvaso Inhalation Solution. We completed the study in October 2020 and announced in January 2021 that the study demonstrated comparable systemic treprostinil exposure between Tyvaso DPI and Tyvaso Inhalation Solution. In December 2020, we completed a clinical study called *BREEZE*, which evaluated the safety and pharmacokinetics of switching PAH patients from Tyvaso Inhalation Solution to Tyvaso DPI. The *BREEZE* study demonstrated the safety and tolerability of Tyvaso DPI in subjects with PAH transitioning from Tyvaso Inhalation Solution, and comparable systemic treprostinil exposure between Tyvaso DPI and Tyvaso Inhalation Solution.

In August 2021 we entered into a commercial supply agreement with MannKind (as amended, the **Supply Agreement**). Pursuant to the Supply Agreement, MannKind is responsible for manufacturing and supplying Tyvaso DPI to us on a cost-plus basis. Unless earlier terminated, the initial term of the Supply Agreement continues until December 31, 2031 and will thereafter be renewed automatically for additional, successive two-year terms unless we give 24 months' written notice of non-renewal, or MannKind gives 48 months' written notice of non-renewal, prior to the end of the initial term or any additional renewal term. In addition, each party has customary termination rights, including termination for the other party's material breach that is not cured within a specific timeframe or in the event of liquidation, bankruptcy or insolvency of the other party.

Ralinepag

Ralinepag is a next-generation, oral, selective, and potent prostacyclin receptor agonist being developed for treatment of PAH. We are enrolling two phase 3 studies of ralinepag: (1) *ADVANCE OUTCOMES*, which is an event-driven study of ralinepag in PAH patients with a primary endpoint of time to first clinical worsening event; and (2) *ADVANCE CAPACITY*, studying the effect of ralinepag on exercise capacity in PAH patients with a primary endpoint of change in peak oxygen uptake via cardiopulmonary exercise test. Both of these studies are global, multi-center, placebo-controlled trials of patients on approved oral background PAH therapies.

Organ Manufacturing

Each year, end-stage organ failure kills millions of people. A significant number of these patients could have benefited from an organ transplant. Unfortunately, the number of usable, donated organs available for transplantation has not grown significantly over the past half century while the need has soared. Our long-term goals are aimed at addressing this shortage. With advances in technology, we believe that creating an unlimited supply of tolerable manufactured organs is now principally an engineering challenge, and we are dedicated to finding engineering solutions. We are engaged in research and development of a variety of technologies designed to increase the supply of transplantable organs and tissues and to improve outcomes for transplant recipients through regenerative medicine, 3-D organ bioprinting, xenotransplantation, and *ex-vivo* lung perfusion.

Part I. Financial Information

In 2019, we entered into a collaboration agreement with the University of Alabama at Birmingham (**UAB**) to develop a pilot-scale, designated pathogen-free facility to house genetically-modified pigs, with a goal of commencing human clinical trials of xenotransplanted kidneys we call UKidneys™ from pigs to humans in the near term. In August 2020, UAB began to conduct operations at the facility with the first introduction of genetically modified pigs, and in March 2021, the facility received its recertification of compliance from the American Association for Accreditation of Laboratory Animal Care. In 2019, we also entered into agreements with NYU Langone Health (**NYU**) and University of Maryland Baltimore to conduct preclinical testing of our porcine xenografts, which have been generating data regarding our UKidneys, UThymoKidneys™, and UHearts™.

While we continue to develop and commercialize therapies for rare and life-threatening conditions, we view organ manufacturing as a complementary solution for a broad array of diseases, many of which (such as PAH) have proven incurable to date through more traditional pharmaceutical and biologic therapies. For this reason, in 2015 we created a wholly-owned PBC called Lung Biotechnology PBC, chartered with the express purpose of “address[ing] the acute national shortage of transplantable lungs and other organs with a variety of technologies that either delay the need for such organs or expand the supply.” It is also why we included the development of “technologies that expand the availability of transplantable organs” as part of our express public benefit purpose when we converted United Therapeutics to a PBC in 2021.

Recently, we and our collaborators announced several key achievements in our organ manufacturing program:

- **First Successful Xenotransplantation of a Porcine Heart:** In January 2022, University of Maryland School of Medicine surgeons successfully transplanted an experimental, genetically-modified UHeart into a living human under an expanded access authorization by the FDA. The patient survived for approximately two months with the UHeart. In June 2022, data from this procedure were published in the *New England Journal of Medicine*.
- **Successful UKidney and UHeart Tests in Preclinical Human Models:** In September 2021, collaborators at NYU and UAB tested UThymoKidneys and UKidneys from our genetically modified pigs in brain-dead organ donors, providing preclinical evidence that genetically modified pig organs could transcend the most proximate immunological barriers to xenotransplantation. Results of the UAB experiment were published in the *American Journal of Transplantation* in January 2022, and results of the NYU experiments were published in the *New England Journal of Medicine* in May 2022.

In June and July 2022, collaborators at NYU tested two UHearts from our genetically modified pigs in brain-dead organ donors. In each case, normal function was observed for our UHearts over a three-day study period, without signs of early rejection.

- **Ex-Vivo Lung Perfusion:** In January 2022, we announced that more than 200 patients had received lung transplants following use of our centralized *ex-vivo* lung perfusion service. This number has continued to grow steadily since that time. *Ex-vivo* lung perfusion technology increases the number of transplantable lungs by giving surgeons the ability to assess the function of marginal lungs to determine if the lungs are suitable for transplantation. This allows for the use of lungs that would have otherwise not been transplanted.
- **Drone Delivery of Organs:** In October 2021, we successfully completed the first-ever drone delivery of a lung for transplant at Toronto General Hospital, demonstrating the feasibility of our goal of delivering our manufactured organs with zero carbon footprint aircraft.

Aurora-GT

We are conducting a clinical study (called *SAPPHIRE*) of a gene therapy product called Aurora-GT, in which a PAH patient’s own endothelial progenitor cells are isolated, transfected with the gene for human endothelial nitric oxide synthase, expanded *ex-vivo*, and then delivered back to the same patient. This product is intended to rebuild the blood vessels in the lungs that are compromised by PAH. This study is being conducted in Canada by Northern Therapeutics, Inc. (**Northern Therapeutics**), a Canadian entity in which we have a 49.7 percent voting stake and a 71.8 percent financial stake. In October 2022, we were notified that Northern Therapeutics intends to discontinue enrollment of new patients at the end of 2022, as a result of the slow enrollment of the study. Upon reviewing the data from the *SAPPHIRE* study, Northern Therapeutics will consider whether to initiate further studies of Aurora-GT. We have the exclusive right to pursue this technology in the United States. Under our agreement with Northern Therapeutics, we have funded all of the expenses of the *SAPPHIRE* program, and will continue to do so through the end of 2022, after which time Northern Therapeutics will be solely responsible for all future costs of developing Aurora-GT outside the United States.

Tyvaso — *PERFECT* study

In September 2022, we terminated the *PERFECT* clinical study of Tyvaso for the treatment of WHO Group 3 pulmonary hypertension associated with chronic obstructive pulmonary disease. We terminated the study based upon a recommendation of the study’s independent Data Safety Monitoring Committee (**DSMC**), following a routine safety and efficacy analysis conducted by the DSMC.

Future Prospects

We anticipate that overall revenue growth over the near-term will be driven primarily by: (1) growth in sales of Tyvaso as a result of the expansion of its label to include PH-ILD and the commercial launch of Tyvaso DPI; (2) continued growth in the number of patients prescribed Orenitram following our expansion of the Orenitram label to reflect the results of the *FREEDOM-EV* study; and (3) modest price increases for some of our products; partially offset by further generic erosion of Adcirca sales. We believe that additional revenue growth in the medium- and longer-term will be driven by commercializing four key therapeutic platforms in our pipeline, which are comprised of the enabling technologies described below, among others:

| Platform | Enabling Technologies |
|--|--|
| Tyvaso and Tyvaso DPI (inhaled treprostinil) | <i>TETON</i> studies |
| Remodulin (parenteral treprostinil) | RemoPro, next-generation Remunity system, alternative pump systems |
| New Chemical Entities and New Biologics | Ralinepag |
| Organ Manufacturing and Transplantation | Xenotransplantation, three-dimensional organ bioprinting, regenerative medicine, <i>ex-vivo</i> lung perfusion |

For further details regarding our research and development initiatives, refer to the section above entitled *Research and Development*.

Our ability to achieve our objectives, grow our business, and maintain profitability will depend on many factors, including among others: (1) the timing and outcome of preclinical research, clinical trials, and regulatory approval applications for products we develop; (2) the timing and degree of our success in commercially launching new products; (3) the demand for our products; (4) the price of our products and the reimbursement of our products by public and private health insurance organizations; (5) the competition we face within our industry, including competition from generic companies and new therapies; (6) our ability to effectively manage our business in an increasingly complex legal and regulatory environment; (7) our ability to defend against challenges to our patents; (8) the duration and severity of the COVID-19 pandemic; and (9) the risks identified in *Part II, Item 1A—Risk Factors*, included in this Quarterly Report on Form 10-Q.

We operate in a highly competitive market in which a small number of large pharmaceutical companies control a majority of available PAH therapies. These pharmaceutical companies are well established in the market and possess greater financial, technical, and marketing resources than we do. In addition, there are a number of investigational products in late-stage development that, if approved, may erode the market share of our existing commercial therapies and make market acceptance more difficult to achieve for any therapies we attempt to market in the future.

Impact of COVID-19 on our Business

Except as otherwise discussed in this Quarterly Report on Form 10-Q, there have been no material changes to the impact of the COVID-19 pandemic on our business since the date of our 2021 Annual Report. Please see the discussion of the impact of COVID-19 on our business in our 2021 Annual Report.

For a discussion of the risks to our business associated with COVID-19, please see the risk factor below entitled, *We face risks and uncertainties related to the COVID-19 pandemic, which could significantly disrupt our operations and/or business for an unknown period of time*.

Results of Operations

Three and Nine Months Ended September 30, 2022 and September 30, 2021

Revenues

The table below presents the components of total revenues (dollars in millions):

| | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|--------------------------|-------------------------------------|-----------------|------------------|----------------------|------------------------------------|-------------------|------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| Net product sales: | | | | | | | | |
| Tyvaso ⁽¹⁾ | \$ 257.7 | \$ 164.2 | \$ 93.5 | 57 % | \$ 630.7 | \$ 441.0 | \$ 189.7 | 43 % |
| Remodulin ⁽²⁾ | 114.0 | 125.4 | (11.4) | (9)% | 377.7 | 395.4 | (17.7) | (4)% |
| Orenitram | 87.5 | 85.2 | 2.3 | 3 % | 249.3 | 233.8 | 15.5 | 7 % |
| Unituxin | 46.1 | 55.3 | (9.2) | (17)% | 146.2 | 152.3 | (6.1) | (4)% |
| Adcirca | 10.7 | 14.6 | (3.9) | (27)% | 30.9 | 47.8 | (16.9) | (35)% |
| Other | — | — | — | — % | 10.0 | — | 10.0 | NM ⁽³⁾ |
| Total revenues | \$ 516.0 | \$ 444.7 | \$ 71.3 | 16 % | \$ 1,444.8 | \$ 1,270.3 | \$ 174.5 | 14 % |

(1) Net product sales include both the drug product and the respective inhalation devices for both Tyvaso and Tyvaso DPI.

(2) Net product sales include sales of infusion devices, such as the Remunity Pump.

(3) Calculation is not meaningful.

Net product sales from our treprostinil-based products (Tyvaso, Remodulin, and Orenitram) grew by \$84.4 million and \$187.5 million for the three and nine months ended September 30, 2022, respectively, as compared to the same periods in 2021.

Tyvaso net product sales for the three and nine months ended September 30, 2022 increased as compared to the same periods in 2021, primarily due to an increase in quantities sold and, to a lesser extent, the impact of a price increase and lower gross-to-net deductions. The increase in quantities sold was driven by our launch of sales of Tyvaso DPI in June 2022 and continued growth in the number of patients following the PH-ILD label expansion in March 2021.

Remodulin net product sales for the three months ended September 30, 2022 decreased as compared to the same period in 2021, due to a \$6.8 million decrease in international Remodulin net product sales and a \$4.6 million decrease in U.S. Remodulin net product sales. Remodulin net product sales for the nine months ended September 30, 2022 decreased as compared to the same period in 2021, primarily due to a \$15.1 million decrease in U.S. Remodulin net product sales, driven by a decrease in quantities sold, partially offset by lower gross-to-net deductions.

Gross-to-Net Deductions

We recognize revenues net of: (1) rebates and chargebacks; (2) prompt pay discounts; (3) allowance for sales returns; and (4) distributor fees. These are referred to as gross-to-net deductions and are primarily based on estimates reflecting historical experiences as well as contractual and statutory requirements. We currently estimate our allowance for sales returns using reports from our distributors and available industry data, including our estimate of inventory remaining in the distribution channel. The tables below include a reconciliation of the liability accounts associated with these deductions (in millions):

| | Three Months Ended September 30, 2022 | | | | | |
|---|---------------------------------------|----------------------|-----------------------------|------------------|----------------|--|
| | Rebates and Chargebacks | Prompt Pay Discounts | Allowance for Sales Returns | Distributor Fees | Total | |
| Balance, July 1, 2022 | \$ 70.8 | \$ 3.5 | \$ 5.3 | \$ 9.8 | \$ 89.4 | |
| Provisions attributed to sales in: | | | | | | |
| Current period | 50.0 | 11.5 | 0.4 | 8.2 | 70.1 | |
| Prior periods | (1.0) | — | (1.7) | 0.4 | (2.3) | |
| Payments or credits attributed to sales in: | | | | | | |
| Current period | (3.7) | (7.0) | — | (2.5) | (13.2) | |
| Prior periods | (47.5) | (3.4) | (0.4) | (5.3) | (56.6) | |
| Balance, September 30, 2022 | \$ 68.6 | \$ 4.6 | \$ 3.6 | \$ 10.6 | \$ 87.4 | |

| | Three Months Ended September 30, 2021 | | | | | |
|---|---------------------------------------|----------------------|-----------------------------|------------------|----------------|--|
| | Rebates and Chargebacks | Prompt Pay Discounts | Allowance for Sales Returns | Distributor Fees | Total | |
| Balance, July 1, 2021 | \$ 61.3 | \$ 3.4 | \$ 8.6 | \$ 5.2 | \$ 78.5 | |
| Provisions attributed to sales in: | | | | | | |
| Current period | 48.3 | 10.2 | — | 8.0 | 66.5 | |
| Prior periods | 6.0 | — | (0.8) | 1.3 | 6.5 | |

| Payments or credits attributed to sales in: | | | | | | |
| Current period | (79.9) | (25.1) | — | (13.7) | (118.7) | |
| Prior periods | (58.2) | (3.0) | (1.2) | (4.9) | (67.3) | |
| Balance, September 30, 2021 | \$ 70.1 | \$ 4.1 | \$ 7.4 | \$ 8.9 | \$ 90.5 | |

Part I. Financial Information

Cost of Product Sales

The table below summarizes cost of product sales by major category (dollars in millions):

| Category: | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|---|-------------------------------------|----------------|------------------|----------------------|------------------------------------|----------------|------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| Cost of product sales | \$ 37.1 | \$ 26.8 | \$ 10.3 | 38 % | \$ 90.8 | \$ 83.9 | \$ 6.9 | 8 % |
| Share-based compensation expense ⁽¹⁾ | 0.1 | 0.9 | (0.8) | (89)% | 2.0 | 4.0 | (2.0) | (50)% |
| Total cost of product sales | \$ 37.2 | \$ 27.7 | \$ 9.5 | 34 % | \$ 92.8 | \$ 87.9 | \$ 4.9 | 6 % |

(1) Refer to *Share-Based Compensation* section below for discussion.

Cost of product sales, excluding share-based compensation. Cost of product sales for the three months ended September 30, 2022 increased as compared to the same period in 2021, primarily due to an increase in royalty expense and product costs due to an overall increase in sales.

Research and Development

The table below summarizes the nature of research and development expenses by major expense category (dollars in millions):

| Category: | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|--|-------------------------------------|----------------|------------------|----------------------|------------------------------------|-----------------|-------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| External research and development ⁽¹⁾ | \$ 37.6 | \$ 35.7 | \$ 1.9 | 5 % | \$ 122.1 | \$ 114.3 | \$ 7.8 | 7 % |
| Internal research and development ⁽²⁾ | 29.1 | 30.8 | (1.7) | (6)% | 96.0 | 87.1 | 8.9 | 10 % |
| Share-based compensation expense ⁽³⁾ | 2.0 | 5.7 | (3.7) | (65)% | 12.8 | 17.0 | (4.2) | (25)% |
| Impairments ⁽⁴⁾ | — | 1.2 | (1.2) | (100)% | — | 130.0 | (130.0) | (100)% |
| Other ⁽⁵⁾ | (2.6) | 5.8 | (8.4) | (145)% | (1.9) | 108.8 | (110.7) | (102)% |
| Total research and development expense | \$ 66.1 | \$ 79.2 | \$ (13.1) | (17)% | \$ 229.0 | \$ 457.2 | \$ (228.2) | (50)% |

(1) *External research and development* primarily includes fees paid to third parties (such as clinical trial sites, contract research organizations, and contract laboratories) for preclinical and clinical studies and payments to third-party contract manufacturers before FDA approval of the relevant product.

(2) *Internal research and development* primarily includes salary-related expenses for research and development functions, internal costs to manufacture product candidates before FDA approval, and internal facilities-related expenses, including depreciation, related to research and development activities.

(3) Refer to *Share-Based Compensation* section below for discussion.

(4) *Impairments* primarily includes impairment charges to write-down the carrying value of in-process research and development and of certain property, plant, and equipment as a result of research and development activities.

(5) *Other* primarily includes upfront fees and milestone payments to third parties under license agreements related to development-stage products, adjustments to the fair value of our contingent consideration obligations, and a one-time expense associated with the redemption of a priority review voucher in the first quarter of 2021.

Research and development expense, excluding share-based compensation. Research and development expense for the three months ended September 30, 2022 decreased as compared to the same period in 2021, primarily due to adjustments to the fair value of our contingent consideration obligations.

Research and development expense for the nine months ended September 30, 2022 decreased as compared to the same period in 2021, due to: (1) a \$107.3 million IPR&D impairment charge related to our March 2021 decision to discontinue the U.S. development of Trevyent; (2) a \$105.0 million purchase of a pediatric disease priority review voucher in January 2021, which we redeemed upon submission of our NDA for Tyvaso DPI; and (3) an \$11.6 million impairment charge related to repurposing one of our facilities during the first quarter of 2021.

Selling, General, and Administrative

The table below summarizes selling, general, and administrative expense by major category (dollars in millions):

| Category: | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|---|-------------------------------------|-----------------|------------------|----------------------|------------------------------------|-----------------|------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| General and administrative | \$ 85.7 | \$ 73.9 | \$ 11.8 | 16 % | \$ 243.9 | \$ 218.3 | \$ 25.6 | 12 % |
| Sales and marketing | 17.2 | 17.2 | — | — % | 47.8 | 48.0 | (0.2) | — % |
| Share-based compensation (benefit) expense ⁽¹⁾ | (4.5) | 18.0 | (22.5) | (125)% | 27.2 | 72.8 | (45.6) | (63)% |
| Total selling, general, and administrative expense | \$ 98.4 | \$ 109.1 | \$ (10.7) | (10)% | \$ 318.9 | \$ 339.1 | \$ (20.2) | (6)% |

(1) Refer to *Share-Based Compensation* below for discussion.

General and administrative, excluding share-based compensation. The increase in general and administrative expense for the three and nine months ended September 30, 2022, as compared to the same periods in 2021, was primarily due to: (1) an increase in branded prescription drug fee expense associated with sales of Tyvaso; and (2) an impairment expense related to property, plant, and equipment.

Share-Based Compensation

The table below summarizes share-based compensation (benefit) expense by major category (dollars in millions):

| Category: | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|---|-------------------------------------|----------------|------------------|----------------------|------------------------------------|----------------|------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| Stock options | \$ 5.7 | \$ 5.8 | \$ (0.1) | (2)% | \$ 16.8 | \$ 19.8 | \$ (3.0) | (15)% |
| Restricted stock units | 9.9 | 6.2 | 3.7 | 60 % | 23.6 | 18.4 | 5.2 | 28 % |
| STAP awards | (18.5) | 12.2 | (30.7) | (252)% | 0.2 | 54.3 | (54.1) | (100)% |
| Employee stock purchase plan | 0.5 | 0.4 | 0.1 | 25 % | 1.4 | 1.3 | 0.1 | 8 % |
| Total share-based compensation (benefit) expense | \$ (2.4) | \$ 24.6 | \$ (27.0) | (110)% | \$ 42.0 | \$ 93.8 | \$ (51.8) | (55)% |

The table below summarizes share-based compensation (benefit) expense by line item in our consolidated statements of operations (dollars in millions):

| | Three Months Ended September 30, | | Dollar Change | Percentage Change | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|---|-------------------------------------|----------------|------------------|----------------------|------------------------------------|----------------|------------------|----------------------|
| | 2022 | 2021 | | | 2022 | 2021 | | |
| Cost of product sales | \$ 0.1 | \$ 0.9 | \$ (0.8) | (89)% | \$ 2.0 | \$ 4.0 | \$ (2.0) | (50)% |
| Research and development | 2.0 | 5.7 | (3.7) | (65)% | 12.8 | 17.0 | (4.2) | (25)% |
| Selling, general, and administrative | (4.5) | 18.0 | (22.5) | (125)% | 27.2 | 72.8 | (45.6) | (63)% |
| Total share-based compensation (benefit) expense | \$ (2.4) | \$ 24.6 | \$ (27.0) | (110)% | \$ 42.0 | \$ 93.8 | \$ (51.8) | (55)% |

The increase in share-based compensation benefit for the three months ended September 30, 2022, as compared to the same period in 2021, was primarily due to an increase in STAP benefit driven by an 11 percent decrease in our stock price for the three months ended September 30, 2022, as compared to a three percent increase in our stock price for the same period in 2021. The decrease in share-based compensation expense for the nine months ended September 30, 2022, as compared to the same period in 2021, was primarily due to: (1) a decrease in STAP expense driven by a three percent decrease in our stock price for the nine months ended September 30, 2022, as compared to a 22 percent increase in our stock price for the same period in 2021; and (2) a decrease in stock option expense due to fewer awards outstanding in 2022. For more information, refer to Note 9—*Share-Based Compensation* to our consolidated financial statements.

Other (Expense) Income, Net

The changes in *other (expense) income, net* for the three and nine months ended September 30, 2022, as compared to the same periods in 2021, were primarily due to net unrealized and realized gains and losses on equity securities. During the first quarter of 2021, we sold an investment that we held in a publicly-traded company. We received \$108.9 million in cash from the sale of the investment and realized a gain of \$91.9 million. Refer to Note 3—*Investments* to our consolidated financial statements.

Income Tax Expense

Income tax expense for the nine months ended September 30, 2022 and 2021 was \$176.6 million and \$89.8 million, respectively. Our effective income tax rate (**ETR**) for the nine months ended September 30, 2022 and 2021 was 23 percent and 20 percent, respectively. Our ETR for the nine months ended September 30, 2022 increased compared to our ETR for the nine months ended September 30, 2021 primarily due to an increase in the valuation allowance in the current period compared to a decrease in the prior period.

Financial Condition, Liquidity, and Capital Resources

We have funded our operations principally through sales of our commercial products and, from time-to-time, third-party financing arrangements. We believe that our current sources of liquidity are sufficient to fund ongoing operations and future business plans as we expect aggregate growth in revenues from our commercial products. Furthermore, our customer base remains stable and we believe that it presents minimal credit risk. However, any projections of future cash flows are inherently subject to uncertainty and we may seek other forms of financing. In March 2022, we entered into a credit agreement (the **2022 Credit Agreement**), which provides for unsecured revolving credit facilities of up to \$2.0 billion. Our aggregate outstanding balance under the 2022 Credit Agreement, which matures in 2027, was \$800.0 million and classified as a non-current liability in our consolidated balance sheet as of September 30, 2022. See *Unsecured Revolving Credit Facilities* below for further details.

Cash and Cash Equivalents and Marketable Investments

Cash and cash equivalents and marketable investments comprise the following (dollars in millions):

| | September 30, 2022 | December 31, 2021 | Dollar Change | Percentage Change |
|---|--------------------|-------------------|-----------------|-------------------|
| Cash and cash equivalents | \$ 966.8 | \$ 894.8 | \$ 72.0 | 8 % |
| Marketable investments—current | 1,648.8 | 1,035.9 | 612.9 | 59 % |
| Marketable investments—non-current | 1,443.8 | 1,649.9 | (206.1) | (12)% |
| Total cash and cash equivalents and marketable investments | \$ 4,059.4 | \$ 3,580.6 | \$ 478.8 | 13 % |

Cash Flows

Cash flows comprise the following (dollars in millions):

| | Nine Months Ended September 30, | | Dollar Change | Percentage Change |
|---|---------------------------------|------------|---------------|-------------------|
| | 2022 | 2021 | | |
| Net cash provided by operating activities | \$ 674.3 | \$ 423.6 | \$ 250.7 | 59 % |
| Net cash used in investing activities | \$ (622.2) | \$ (291.1) | \$ (331.1) | (114)% |
| Net cash provided by financing activities | \$ 19.9 | \$ 37.3 | \$ (17.4) | (47)% |

Operating Activities

Our operating assets and liabilities consist primarily of accounts receivable, inventories, accounts payable, accrued expenses, liabilities for our STAP awards, and tax-related payables and receivables.

The increase of \$250.7 million in net cash provided by operating activities for the nine months ended September 30, 2022, as compared to the nine months ended September 30, 2021, was primarily due to: (1) a \$105.0 million purchase of a pediatric disease priority review voucher during the nine months ended September 30, 2021; and (2) a \$25.3 million decrease in cash paid to settle STAP awards. The remainder of the increase in cash provided by operating activities was due to other changes in assets and liabilities.

Investing Activities

The increase of \$331.1 million in net cash used in investing activities for the nine months ended September 30, 2022, as compared to the nine months ended September 30, 2021, was primarily due to: (1) a \$280.5 million increase in cash used for total purchases, sales, and maturities of marketable investments; and (2) a \$49.1 million increase in cash paid to purchase property, plant, and equipment.

Financing Activities

The decrease of \$17.4 million in net cash provided by financing activities for the nine months ended September 30, 2022, as compared to the nine months ended September 30, 2021, was primarily due to: (1) a \$9.4 million decrease in proceeds from the exercise of stock options; and (2) a \$7.5 million increase in payments of debt issuance costs related to the 2022 Credit Agreement.

Unsecured Revolving Credit Facilities

In March 2022, we entered into the 2022 Credit Agreement, which provides for unsecured revolving credit facilities of up to \$2.0 billion. On March 31, 2022, we borrowed \$800.0 million under the facilities and used the funds to repay outstanding indebtedness under the then-existing credit agreement (the **2018 Credit Agreement**). This balance remained outstanding as of September 30, 2022. Refer to Note 8—*Debt—2022 Credit Agreement* to our consolidated financial statements.

Summary of Critical Accounting Policies

The preparation of our consolidated financial statements in conformity with U.S. generally accepted accounting principles requires our management to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes. We continually evaluate our estimates and judgments to determine whether they are reasonable, relevant, and appropriate. These assumptions are frequently developed from historical data or experience, currently available information, and anticipated developments. By their nature, our estimates are subject to an inherent degree of uncertainty; consequently, actual results may differ. We discuss critical accounting policies and estimates that involve a higher degree of judgment and complexity in *Part II, Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations* in our 2021 Annual Report. There have been no material changes to our critical accounting policies and estimates as disclosed in our 2021 Annual Report.

Recently Issued Accounting Standards

See Note 2—*Basis of Presentation*, to our consolidated financial statements for information on our adoption during the current period and anticipated adoption of recently issued accounting standards.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk has not materially changed since December 31, 2021.

Item 4. Controls and Procedures

Based on their evaluation, as of September 30, 2022, our Chairperson and Chief Executive Officer and our Chief Financial Officer and Treasurer have concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) are effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, summarized, processed, and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to our management, including our Chairperson and Chief Executive Officer and our Chief Financial Officer and Treasurer, as appropriate to allow timely decisions regarding required disclosure. There have been no changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, such internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

Please refer to the following disclosures, which are incorporated herein by reference: (1) Note 13—*Litigation* to our consolidated financial statements contained elsewhere in this Quarterly Report on Form 10-Q; and (2) *Patent Litigation with ANI Pharmaceuticals, Inc.*, within Note 13—*Litigation* to our consolidated financial statements contained in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2022.

Item 1A. Risk Factors

Risks Related to Our Products and Our Operations

We rely heavily on sales of our tadalafil-based therapies to generate revenues and support our operations.

Sales of our tadalafil-based therapies — Tyvaso, Tyvaso DPI, Remodulin, and Orenitram — comprise the vast majority of our revenues. Substantially decreased sales of any of these products could have a material adverse impact on our operations. A wide variety of events, such as withdrawal of regulatory approvals or substantial changes in prescribing practices or dosing patterns, many of which are described in other risk factors below, could cause sales of these products to materially decline, or to grow more slowly than expected. The current and expected availability of generic versions of our products has decreased and may continue to decrease our revenues. The approval of new therapies may negatively impact sales of our current and potential new products. Sales may decrease if any third party that manufactures, markets, distributes, or sells our commercial products cannot do so satisfactorily, or we cannot manage our internal manufacturing processes. Finally, if demand for Tyvaso DPI does not meet our expectations, the revenue opportunity for our tadalafil products could be significantly lower than we expect.

If our products fail in clinical trials, we will be unable to sell those products.

To obtain approvals from the FDA and international regulatory agencies to sell new products, or to expand the product labeling for our existing products, we must conduct clinical trials demonstrating that our products are safe and effective. Regulators have substantial discretion over the approval process. Regulators may require us to amend ongoing trials or perform additional trials, which have in the past and could in the future result in significant delays and additional costs and may be unsuccessful. Delays and costs associated with regulatory requirements to change or add trials have sometimes caused us to discontinue efforts to develop a particular product, and may do so again in the future. If our clinical trials are not successful, or we fail to address identified deficiencies adequately, we will not obtain required approvals to market the new product or new indication. We cannot predict with certainty how long it will take, or how much it will cost, to complete necessary clinical trials or obtain regulatory approvals of our current or future products. The time and cost needed to complete clinical trials and obtain regulatory approvals varies by product, indication, and country. In addition, failure to obtain, or delays in obtaining, regulatory approval has in the past and could in the future require us to recognize impairment charges.

Our clinical trials have been (for example, the *PERFECT* study), and in the future may be, discontinued, delayed, canceled, or disqualified for various reasons, including: (1) the COVID-19 pandemic, which initially caused us to suspend enrollment of most of our clinical studies, and may do so again; (2) the drug is ineffective, or physicians and/or patients believe that the drug is ineffective, or that other therapies are more effective or convenient; (3) patients do not enroll in or complete clinical trials at the rate we expect; (4) we, or clinical trial sites or other third parties do not adhere to trial protocols and required quality controls under good clinical practices (**GCP**) regulations and similar regulations outside the United States; (5) patients experience severe side effects during treatment or die during our trials because of adverse events; and (6) the results of clinical trials conducted in a particular country are not acceptable to regulators in other countries.

We may not compete successfully with established or newly developed drugs or products.

Competition could negatively impact our operating results. We compete with well-established drug companies for market share, as well as, among other things, funding, licenses, expertise, personnel, clinical trial patients and investigators, consultants, and third-party collaborators. Many of these competitors have substantially greater financial, marketing, manufacturing, sales, distribution, and technical resources, and a larger number of approved products, than we do. Many of these competitors also possess greater experience in areas critical to success such as research and development, clinical trials, sales and marketing, and regulatory matters.

Numerous treatments currently compete with our commercial therapies. For example, for treatment of PAH, we compete with over fifteen branded and generic drugs. Sales of a generic version of Adcirca launched in August 2018 have had a material adverse impact on our sales of Adcirca. The availability of generic versions of Remodulin in the United States could materially impact our revenues, and generic competition has materially impacted our Remodulin revenues outside the United States. Our competitors are also developing new products that may compete with ours. For example, Liquidia and Merck are developing Yutrepia and sotatercept, respectively, which if successful would compete with our treprostinil-based products.

Patients and doctors may discontinue use of our products if they perceive competing products as safer, more effective, less invasive, more convenient, and/or less expensive than ours. Doctors may reduce the prescribed doses of our products if they prescribe them in combination with competing products. In addition, many competing therapies are less invasive or more convenient than our products, and use of these competing therapies often delays or prevents initiation of our therapies.

The successful commercialization of our products depends on the availability of coverage and adequacy of reimbursement from third-party payers, including governmental authorities and private health insurers. Pharmaceutical pricing and reimbursement pressures may negatively impact our sales.

The commercial success of our products depends, in significant part, on coverage by governmental payers such as Medicare and Medicaid, and private insurance companies. A reduction in the availability or extent of reimbursement from domestic or foreign government health care programs could have a material adverse effect on our business and results of our operations. Government payers and/or third-party payers are increasingly attempting to limit the price of medicinal products and frequently challenge the pricing of new or expensive drugs. In many markets outside the United States, governments control the prices of prescription pharmaceuticals through the implementation of reference pricing, price cuts, rebates, revenue-related taxes, and profit control. Financial pressures may cause United States government payers and/or private health insurers to implement policies that would reduce reimbursement rates for our products, limit future price increases, cap reimbursement rates for pharmaceuticals to rates paid internationally, require the automatic substitution of generic products, demand more rigorous requirements for initial coverage for new products, implement step therapy policies that require patients to try other medicines, including generic products, before using our products, or take other similar steps that could make it more difficult for patients to access our products. See, for example, the discussion of the Inflation Reduction Act contained within the risk factor below entitled *Government healthcare reform and other reforms could adversely affect our revenue, costs, and results of operations*.

Our prostacyclin analogue products (Tyvaso, Tyvaso DPI, Remodulin, and Orenitram) and our oncology product (Unituxin) are expensive therapies. Specialty pharmacy distributors may not be able to obtain adequate reimbursement for our products from commercial and government payers to motivate them to support our products. Third-party payers may reduce the amount of reimbursement for our products based on changes in pricing of other therapies for the same disease or the development of new payment methodologies to cover and reimburse treatment costs, such as the use of cost-effectiveness research or value-based payment contracts. Third-party payers often encourage the use of less-expensive generic alternative therapies, which has materially impacted our Adcirca revenues and which may materially impact our Remodulin revenues. If commercial and/or government payers do not cover our products or limit payment rates, patients and physicians could choose covered competing products and may have lower out-of-pocket costs.

Our manufacturing strategy exposes us to significant risks.

We must be able to manufacture sufficient quantities of our commercial products to satisfy demand. We manufacture Remodulin, Orenitram, Tyvaso, and Unituxin, including the active ingredient in each of these products, at our own facilities and rely on third parties for additional manufacturing capacity for Remodulin and Tyvaso. We rely entirely on MannKind to manufacture Tyvaso DPI, Minnetronix Inc. to manufacture the Tyvaso Inhalation System, and DEKA to manufacture the Remunity Pump for Remodulin, and we rely on a variety of other third-party sole manufacturers for certain elements of our commercial and development-stage products, as detailed under the risk factor below entitled, *We rely in part on third parties to perform activities that are critical to our business*. If any of our internal or third-party manufacturing and supply arrangements are interrupted for compliance issues, issues related to the COVID-19 pandemic, or other reasons, we may not have sufficient inventory to meet future demand. Changes in suppliers and/or service providers could interrupt the manufacturing of our commercial products and impede the progress of our commercial launch plans and clinical trials.

Our internal manufacturing process subjects us to risks as we engage in increasingly complex manufacturing processes. We manufacture our entire supply of Orenitram and Unituxin without an FDA-approved back-up manufacturing site, and do not plan to engage a third party to manufacture these materials. Our long-term organ manufacturing programs will involve exceptionally complicated manufacturing processes, many of which have never been attempted on a clinical or commercial scale. It will take substantial time and resources to develop and implement such manufacturing processes, and we may never be able to do so successfully. Additional risks of our manufacturing strategy include the following:

- We, our third-party manufacturers, and other third parties involved in the manufacturing process, such as third parties that operate testing and storage facilities, are subject to the FDA's current good manufacturing practices regulations, current good tissue practices, and similar international regulatory standards, and other quality standards related to device manufacturing. Our ability to exercise control over regulatory compliance by our third-party manufacturers is limited.
- We may experience difficulty designing and implementing processes and procedures to ensure compliance with applicable regulations as we develop manufacturing operations for new products.

Part II. Other Information

- Natural and man-made disasters (such as fires, contamination, power loss, hurricanes, earthquakes, flooding, terrorist attacks, and acts of war), disease outbreaks, and pandemics such as COVID-19 impacting our internal and third-party manufacturing sites could cause a supply disruption.
- Even if we, our third-party manufacturers, and other third parties involved in the manufacturing process comply with applicable drug and device manufacturing regulations, the sterility and quality of our products could be substandard and such products could not be sold or used or could be subject to recalls.
- The FDA and its international counterparts would require new testing and compliance inspections of new manufacturers of our products, or new manufacturing facilities we operate.
- The FDA and other regulatory agencies may not be able to timely inspect our facilities, or those of our third-party manufacturers, due to COVID-19-related delays or other reasons, which could result in delays in obtaining necessary regulatory approvals for our products.
- We may be unable to contract with needed manufacturers on satisfactory terms or at all.
- The supply of materials and components necessary to manufacture and package our products may become scarce or unavailable, which could delay the manufacturing and subsequent sale of such products. Products manufactured with substituted materials or components must be approved by the FDA and applicable international regulatory agencies before they could be sold. For example, supply disruptions caused by COVID-19 impacted DEKA's ability to secure certain components and raw materials necessary to manufacture sufficient quantities of Remunity Pumps and accessories, delaying our ability to commence commercial sales, and ongoing global semiconductor supply disruptions could impact our third-party manufacturers' ability to secure semiconductor chips necessary to manufacture sufficient quantities of devices required to deliver Tyvaso and Remodulin, which would have a material impact on our operations.
- Our business partners who manufacture the devices to deliver our products are subject to the FDA's medical device requirements. Any non-compliance, recall, or enforcement action issued against them could adversely impact our sales and operations.
- The infrastructure of our internal manufacturing facilities, along with certain facilities of our third-party manufacturers, is aging. These facilities have highly sophisticated and complex utility systems. If any of these systems require long-term repair or replacement, the impacted facility may not be able to manufacture product for a substantial period of time.
- We, along with our third-party manufacturers, rely upon local municipalities to supply our facilities with clean water, which is processed into high purity water and used as a key ingredient for three of our commercial drug products. If local municipalities are unable to supply water that meets relevant quality standards, we and our third-party manufacturers may be unable to manufacture product until such a situation is remediated.
- Our supply chain for raw materials and consumables extends worldwide and is complex. Suppliers based in China play a substantial role in our supply chain. Political unrest or trade disputes involving China or other countries in our supply chain could impact our ability and the ability of our third-party manufacturers to source raw materials and consumables.
- We are closely monitoring the military conflict in Ukraine. Although we do not directly source any raw materials or consumables from Ukraine, Russia, or Belarus, our European-based suppliers and service providers could be impacted by an extended conflict or an escalation into neighboring countries.

Any of these factors could disrupt sales of our commercial products, delay clinical trials or commercialization of new products, result in product liability claims and product recalls, and entail higher costs. Interruptions in our manufacturing process could be significant given the length of time and complexity involved in obtaining necessary regulatory approvals for alternative arrangements, through either third parties or internal manufacturing processes.

We face risks and uncertainties related to the COVID-19 pandemic, which could significantly disrupt our operations and/or business for an unknown period of time.

Our business, operations, financial results, liquidity, and stock price could be adversely impacted by the effects of the global COVID-19 pandemic. The extent of such impact, including the duration and magnitude of such effects, will depend on numerous factors that we cannot accurately predict or assess, including, among others: the duration and scope of the pandemic, including the emergence of new strains, such as the "Delta", "Omicron", and future variants; its impact on global and regional healthcare infrastructure, and the ability of patients to obtain medical care; the negative impact on global and regional economies and economic activity; actions governments, businesses, and individuals take in response to the pandemic; the roll-out and long-term safety and efficacy of vaccines; and how quickly economies and medical systems recover after the pandemic subsides. Our business could be materially adversely affected as a result of the COVID-19 pandemic due to social distancing/self-isolation, the burden the pandemic has placed on healthcare infrastructure, workplace and physician office closures, travel disruptions, quarantines, and other factors, which could cause, among other things:

- **Interruption of our development pipeline.** Approvals of new products we are developing, potential label expansions for existing products, and the launch of newly-approved products may be delayed or hindered, which would harm our revenue growth prospects. The pandemic has caused, and may continue to cause, delays or difficulties with clinical site initiation and recruiting clinical site investigators and clinical site staff. Any prolongation or de-prioritization of our clinical trials or delay in regulatory review resulting from such disruptions could materially affect the development and study of our new products and label expansions.

- **A decrease in revenues from our existing products.** COVID-19 made it difficult or impossible for many patients to visit their physicians' offices to determine whether our medicines may be appropriate, and also prevented our field-based teams from meeting in-person with physicians. As a result, in April 2020 we experienced a temporary decline in the number of new patients starting our treprostinil-based medicines. While new patient starts returned to pre-pandemic levels, a decline could recur as the COVID-19 pandemic continues or if the pandemic causes access to medical care to become further restricted, which could cause a negative impact on our revenues. In addition, disruption of our supply chain caused by COVID-19 could negatively impact our revenues.
- **Disruption of our operations.** COVID-19 could disrupt many aspects of our operations, which could harm our business and prospects. We and third parties with which we engage also may experience operational challenges caused by sickness of employees or their families, the desire of employees to avoid contact with large groups of people, or employees working from home. Mass vaccine production and distribution efforts (such as Operation Warp Speed), as well as backlogs at major ports of entry, impacted availability and lead times for certain materials used in the manufacture of our products. If we, or our third-party suppliers and contract manufacturers, are unable to source materials, it may prevent us from manufacturing our products for an indefinite period until such materials become available.

COVID-19, and the volatile regional and global economic conditions stemming from the pandemic, could also precipitate or aggravate the other risk factors discussed in this Quarterly Report on Form 10-Q, which could materially adversely affect our business, financial condition, results of operations, liquidity, and stock price. Further, the COVID-19 pandemic, or any future outbreak of disease, may also affect our operating and financial results in a manner that is not presently known to us or that we currently do not consider to present significant risks. The possible extent of the impact of the COVID-19 pandemic is inherently difficult to predict and will ultimately depend on a number of factors outside our control, including the ultimate duration and severity of the pandemic and the resulting economic impact.

We rely in part on third parties to perform activities that are critical to our business.

Third parties assist us in activities critical to our operations, such as: (1) manufacturing our clinical and commercial products; (2) conducting clinical trials, preclinical studies, and other research and development activities; (3) obtaining regulatory approvals; (4) conducting pharmacovigilance-related and product complaint activities, including drug safety, reporting adverse events, and product complaints; (5) obtaining medical device clearances and approvals for the devices used to deliver our drugs; and (6) marketing and distributing our products. Any disruption in the ability of third parties to continue to perform these critical activities, including as a result of the COVID-19 pandemic, could materially adversely impact our business and results of operations. Any change in service providers could interrupt the manufacture and distribution of our products and services, and impede the progress of our clinical trials, commercial launch plans, and related revenues.

We rely on various distributors to market, distribute, and sell our commercial products. If they are unsuccessful in, or reduce or discontinue, their sales efforts, our revenues may decline materially. Outside the United States, we rely substantially on our international distributors to obtain and maintain regulatory approvals for our products and to market and sell our products in compliance with applicable laws and regulations. In the United States, we derive all of our treprostinil-based revenues from sales to two distributors, Accredo and CVS Specialty. If either of these two distributors places significantly larger or smaller orders in a given time period, our revenues can be materially impacted in a way that does not reflect patient demand.

We rely entirely on third parties to supply pumps and other supplies necessary to deliver Remodulin. There are a limited number of pumps available in the market, and the discontinuation of any particular pump could have a material, adverse impact on our Remodulin revenues if a viable supply of an alternate pump is not available. Smiths Medical discontinued manufacturing the MS-3 system used to deliver subcutaneous Remodulin, and specialty pharmacy distributors have informed us that supplies of MS-3 pumps are nearly exhausted. Smiths Medical has also announced plans to discontinue the CADD Legacy system used to deliver intravenous Remodulin. Historically, these are the pumps primarily used to deliver Remodulin to patients in the United States. In 2021, we launched the Remunity Pump to deliver subcutaneous Remodulin, and Smiths Medical plans to make an alternative pump, the CADD Solis, available for intravenous Remodulin. We are also engaged in further efforts to develop alternative pumps to deliver Remodulin. However, if these alternative systems are not seen as adequate substitutes, or are not developed on a timely basis, our sales of Remodulin could be materially, adversely impacted.

Lilly manufactures and supplies Adcirca for us. We use Lilly's pharmaceutical wholesaler network to distribute Adcirca. If Lilly is unable to manufacture or supply Adcirca or its distribution network is disrupted, it could delay, disrupt, or prevent us from selling Adcirca. We rely entirely on Minnetronix Inc. as the sole manufacturer of the Tyvaso Inhalation System. As Tyvaso is a drug-device combination, we cannot sell Tyvaso without the Tyvaso Inhalation System.

We rely entirely on MannKind to manufacture Tyvaso DPI for us. If MannKind is unable to manufacture Tyvaso DPI for us for any reason, our commercial sales of Tyvaso DPI would be materially and adversely impacted.

We rely entirely on DEKA and its affiliates for the manufacture of the Remunity Pump for Remodulin. Finally, we also rely on various sole-source suppliers for manufacturing activities related to ralinepag, RemoPro, and other pumps we are developing for Remodulin. For a further discussion of risks created by the use of third-party contract manufacturers, see the risk factor above entitled, *Our manufacturing strategy exposes us to significant risks.*

We rely heavily on third-party contract research organizations, contract laboratories, clinical investigative sites, and other third parties to conduct our clinical trials, preclinical studies and other research and development activities. In addition, the success of certain products we are developing will depend on clinical trials sponsored by third parties. Third-party failure to conduct or

Part II. Other Information

assist us in conducting clinical trials in accordance with study protocols, quality controls, GCP, or other applicable requirements or to submit associated regulatory filings, could limit or prevent our ability to rely on results of those trials in seeking regulatory approvals.

Reports of actual or perceived side effects and adverse events associated with our products could cause our sales to decrease.

Reports of side effects and adverse events associated with our products could affect a physician's decision to prescribe or a patient's willingness to use our products, which may have a significant adverse impact on sales of our products. An example of a known risk associated with the delivery system used for intravenous Remodulin is sepsis, which is a serious and potentially life-threatening infection of the bloodstream caused by a wide variety of bacteria. In addition, Unituxin is associated with severe side effects, and its label contains a boxed warning related to potential infusion reactions and neurotoxicity. We are required to report certain adverse events to the FDA. Development of new products, and new formulations and indications for existing products, could result in new side effects and adverse events which may be serious in nature.

Negative attention from special interest groups may impair our business.

Our early-stage research and development involves animal testing required by regulatory authorities, which we conduct both directly and through contracts with third parties. Our xenotransplantation and regenerative medicine programs rely heavily on the use of animals to manufacture and test our products. Certain special interest groups categorically object to the use of animals for research purposes. Any negative attention, threats or acts of vandalism directed against our animal research activities could impede the operation of our business.

We may not maintain adequate insurance coverage to protect us against significant product liability claims.

The testing, manufacturing, marketing, and sale of drugs and diagnostics involve product liability risks. We may not be able to maintain our current product liability insurance at an acceptable cost, if at all. In addition, our insurance coverage may not be adequate for all potential claims. If losses significantly exceed our liability insurance coverage, we may experience financial hardship or potentially be forced out of business. Clinical testing and eventual marketing and sale of new products, reformulated versions of existing products, or use of existing products in new indications could expose us to new product liability risks that are not covered by our existing policies.

If we fail to attract and retain key management and qualified scientific and technical personnel, we may not be able to achieve our business objectives.

Members of our management team, including our founder, Chairperson and Chief Executive Officer, Dr. Martine Rothblatt, play a critical role in defining our business strategy and maintaining our corporate culture. The loss of the services and leadership of Dr. Rothblatt or any other members of our senior management team could have an adverse effect on our business. We do not maintain key person life insurance on our senior management team members. Failure to identify, hire, and retain suitable successors for members of our senior management team and to transfer knowledge effectively could impede the achievement of our business objectives. Our future success also depends on our ability to attract and retain qualified scientific and technical personnel. Competition for such personnel in our industries is intense. If we fail to attract and retain such employees, whom we call "Unitherians," we may not be successful in developing and commercializing new therapies.

Risks Related to Legal Compliance

We must comply with extensive laws and regulations in the United States and other countries. Failure to obtain approvals on a timely basis or to comply with these requirements could delay, disrupt, or prevent commercialization of our products.

The products we develop must be approved for marketing and sale by regulatory agencies. Our research and development efforts must comply with extensive regulations, including those promulgated by the FDA and the U.S. Department of Agriculture. The process of obtaining and maintaining regulatory approvals for new drugs, biologics, and medical devices is lengthy, expensive, and uncertain. The regulatory approval process is particularly uncertain for our transplantation programs, which include the development of xenotransplantation, regenerative medicine, 3-D organ bioprinting, and cell-based products. Once approved, the manufacture, distribution, advertising, and marketing of our products are subject to extensive regulation, including product labeling, strict pharmacovigilance and adverse event and medical device reporting, complaint processing, storage, distribution, and record-keeping requirements. Our product candidates have in the past and may in the future fail to receive regulatory approval. If granted, product approvals can be conditioned on the completion of post-marketing clinical studies, accompanied by significant restrictions on the use or marketing of a given product and withdrawn for failure to comply with regulatory requirements, such as post-marketing requirements and post-marketing commitments, or upon the occurrence of adverse events subsequent to commercial introduction. Our ability to obtain FDA approval for our products has been, and in the future may be, materially impacted by the outcome and quality of our clinical trials and other data submitted to regulators, as well as the quality of our manufacturing operations and those of our third-party contract manufacturers and contract laboratories. In addition, third parties may submit citizen petitions to the FDA seeking to delay approval of, or impose additional approval conditions for, our products. If successful, citizen petitions can significantly delay, or even prevent, the approval of our products. For example, a third party submitted a citizen petition to the FDA requesting that the FDA refuse to approve Tyvaso DPI, and/or impose additional requirements in order to approve the product. This led to a delay in the FDA's approval of our NDA for Tyvaso DPI.

Regulatory approval for our currently marketed products is limited by the FDA and other regulators to those specific indications and conditions for which clinical safety and efficacy have been demonstrated.

Any regulatory approval of our products is limited to specific diseases and indications for which our products have been deemed safe and effective by the FDA. FDA approval is also required for new formulations and new indications for an approved product. While physicians may prescribe drugs for uses that are not described in the product's labeling and for uses that differ from those approved by regulatory authorities (called "off-label" uses), our ability to promote our products is limited to those indications that are specifically approved by the FDA. Failure to follow FDA rules and guidelines related to promotion and advertising can result in the FDA's refusal to approve a product, suspension or withdrawal of an approved product from the market, product recalls, enforcement action, civil lawsuits, or criminal prosecution.

We must comply with various laws in jurisdictions around the world that restrict certain marketing practices.

Our business activities may be subject to challenge under laws in jurisdictions around the world restricting particular marketing practices, such as:

- Anti-kickback and false claim statutes, the Foreign Corrupt Practices Act, and the United Kingdom Bribery Act. In the United States, the Federal Anti-Kickback Statute prohibits, among other activities, knowingly and willfully offering, paying, soliciting, or receiving remuneration (i.e., anything of value) to induce, or in return for, the purchase, lease, order or arranging the purchase, lease or order of any health care product or service reimbursable under any federally financed healthcare program like Medicare or Medicaid. This statute is interpreted broadly to apply to arrangements between pharmaceutical manufacturers and prescribers, purchasers, specialty pharmacies, formulary managers, patients, and others. Our practices may not always qualify for safe harbor protection under this statute.
- The Federal False Claims Act, which prohibits any person from knowingly presenting or causing to be presented a false or fraudulent claim for payment of government funds, or making or causing a false statement material to a false or fraudulent claim. Pharmaceutical and health care companies have faced liability under this law for causing false claims to be submitted because they marketed a product for unapproved and non-reimbursable uses.
- Analogous state laws and regulations, including anti-kickback and false claims laws, which apply to items and services reimbursed under Medicaid or, in several states, regardless of the payer, including private payers.

Compliance with these and similar laws on a state-by-state basis is difficult, time consuming, and requires substantial resources. Any investigation, inquiry, or other legal proceeding under these laws related to our operations, even if we successfully defend against it, or any penalties imposed upon us for failure to comply, could have a material adverse effect on our business and financial condition or reputation. Sanctions under these federal and state laws may include treble civil monetary penalties, payment of damages, fines, exclusion of our products from reimbursement under federal health care programs, imprisonment, and the curtailment or restructuring of our operations.

Government healthcare reform and other reforms could adversely affect our revenue, costs, and results of operations.

Our industry is highly regulated and changes in law or government health care programs may adversely impact our business, operations, or financial results. We cannot predict how future federal or state legislative or administrative changes related to healthcare reform will affect our business.

Political, economic, and regulatory influences may lead to fundamental changes in the U.S. healthcare industry, particularly given the current atmosphere of mounting criticism of prescription drug costs in the U.S. We expect there will continue to be legislative and regulatory proposals to change the healthcare system in ways that could impact our ability to commercialize and to sell our products profitably.

At the federal level, there have been and continue to be a number of healthcare-related legislative and regulatory initiatives and reforms that significantly affect the pharmaceutical industry. For example, the Patient Protection and Affordable Care Act of 2010 (**PPACA**) substantially changed the way healthcare is financed by both governmental and commercial payers, and has significantly impacted the U.S. pharmaceutical industry. The PPACA is a broad measure intended to expand healthcare coverage within the United States, primarily through the imposition of health coverage-related mandates on employers and individuals and expansion of the Medicaid program.

Additionally, there has been increasing legislative, regulatory, and enforcement interest in the United States regarding drug pricing practices. Among other things, there have been several U.S. Congressional inquiries and proposed and enacted federal and state legislation designed to, among other things: bring more transparency to drug pricing; reduce the cost of prescription drugs under government payer programs; review the relationship between pricing and manufacturer patient programs; and reform government program reimbursement methodologies for drugs.

Significantly, on August 16, 2022, President Biden signed the Inflation Reduction Act of 2022 (**IRA**) into law. This statute marks the most significant action by Congress with respect to the pharmaceutical industry since adoption of the PPACA in 2010. Among other things, the IRA requires manufacturers of certain drugs to engage in price negotiations with Medicare (beginning in 2026), with prices that can be negotiated subject to a cap; imposes rebates under Medicare Part B and Medicare Part D to penalize price increases that outpace inflation (first due in 2023); and replaces the Medicare Part D coverage gap discount program with a new discounting program (beginning in 2025). The IRA permits the Secretary of the Department of Health and Human Services (**HHS**) to implement many of these provisions through guidance, as opposed to regulation, for the initial years. For that and other

Part II. Other Information

reasons, it is currently unclear how the IRA will be effectuated, and while the impact of the IRA on the pharmaceutical industry cannot yet be fully determined, it is likely to be significant.

In addition, Congress has recently enacted other statutes that could adversely affect our ability to successfully commercialize our products. Under the American Rescue Plan Act of 2021, effective January 1, 2024, the statutory cap on Medicaid Drug Rebate Program rebates that manufacturers pay to state Medicaid programs will be eliminated, which could increase our Medicaid rebate liability.

Individual states in the United States have also increasingly passed legislation and implemented regulations designed to control pharmaceutical and biological product pricing, including price or patient reimbursement limitations, marketing cost disclosure, and transparency measures, and, in some cases, measures designed to encourage importation from other countries and bulk purchasing. In addition, regional healthcare authorities and individual hospitals are increasingly using bidding procedures to determine what pharmaceutical products and which suppliers will be included in their prescription drug and other healthcare programs.

We anticipate that the IRA and other healthcare reform measures that may be adopted in the future may result in additional downward pressure on coverage and the payment that we receive for any approved product, and adversely impact our business. Any reduction in reimbursement from Medicare and other government programs may result in a similar reduction in payment from commercial payers. The implementation of cost containment measures or other healthcare reforms may prevent us from being able to generate revenue, attain profitability, or commercialize our products. Further state and federal healthcare reform measures adopted in the future could limit the amounts that state and federal governments will pay for healthcare products and services, which could result in reduced demand for our products or additional pricing pressure.

In October 2020, HHS and the FDA issued a final rule and guidance concerning two new pathways for importing lower-cost drugs into the United States. The final rule allows certain prescription drugs to be imported from Canada, and the guidance describes procedures for drug manufacturers to facilitate the importation of FDA-approved drugs and biologics manufactured abroad and originally intended for sale in a foreign country into the United States. More recently, the Biden administration reaffirmed its goal of taking further action with respect to the pharmaceutical industry, beyond implementation of the IRA. It is difficult to predict the impact, if any, of any such legislation or executive actions on the use of and reimbursement for our products in the United States, including the potential for the importation of generic versions of our products.

If we fail to comply with our reporting and payment obligations under the Medicaid Drug Rebate Program or other governmental pricing programs, we could be subject to additional reimbursement requirements, penalties, sanctions, and fines, which could adversely impact our business, financial condition, results of operations, and prospects.

We participate in, and have certain price reporting obligations to, the Medicaid Drug Rebate program and other governmental programs that require us to pay rebates or offer discounts on our products. Certain programs, such as the 340B program and the U.S. Department of Veteran Affairs (**VA**) Federal Supply Schedule (**FSS**) pricing program, impose limits on the price we are permitted to charge certain entities for our products or for any future products for which we receive regulatory approval. Statutory and regulatory changes regarding these programs and their requirements could negatively affect the coverage and reimbursement by these programs of our products or any future products for which we receive regulatory approval and could negatively impact our results of operations. Our failure to comply with these price reporting, rebate payment, or pricing requirements could adversely impact our financial results. Applicable laws and regulations, including the PPACA, and regulations promulgated thereunder, could affect our obligations in ways we cannot anticipate.

Pricing and rebate calculations vary among products and programs. The calculations are complex and are often subject to interpretation by us, governmental or regulatory agencies, and the courts. If we must restate or recalculate information provided under these programs, our costs of compliance could increase. Additionally, we could be held liable for errors associated with our submission of pricing data, including retroactive rebates and program refunds. We may incur significant civil monetary penalties if we are found to have knowingly submitted false average manufacturer price or best price information to the government, to have made a misrepresentation in our reporting of average sales price figures, to have knowingly provided false information in connection with a non-federal average manufacturing price filing, or to have charged 340B covered entities more than the statutorily mandated ceiling price. Certain failures to timely submit required data also could result in a civil monetary penalty for each day the information is late. We could also become subject to allegations under the False Claims Act and other laws and regulations. In addition, misreporting and failure to timely report data to U.S. Centers for Medicare & Medicaid Services (**CMS**) also can be grounds for CMS to terminate our Medicaid drug rebate agreement, pursuant to which we participate in the Medicaid Drug Rebate program. In the event that CMS terminates our rebate agreement, no federal payments would be available under Medicaid or Medicare Part B for our covered outpatient drugs.

CMS, the VA, and the Office of Inspector General of the Department of Health and Human Services (**OIG**) have pursued manufacturers that were alleged to have failed to report data to the government in a timely manner. Governmental agencies may also make changes in program interpretations, requirements or conditions of participation, some of which may have implications for amounts previously estimated or paid. We cannot guarantee that our submissions will not be found by CMS, the VA, or other governmental agencies to be incomplete or incorrect.

We may be subject to enforcement action or penalties based on our current policy regarding the distribution of 340B program drugs at 340B ceiling prices through third-party pharmacies that contract with covered entities participating in the 340B program, known as "340B contract pharmacies". Increasing use of 340B contract pharmacies, coupled with a lack of oversight and transparency, has resulted in increased risks of 340B statutory violations related to the diversion of 340B-purchased drugs

to individuals who are not patients of the 340B covered entity, and to prohibited “duplicate discounts” when 340B-purchased drugs are also billed to Medicaid. These program integrity risks have been exacerbated by the exponential growth in the use of 340B contract pharmacies over the past decade. We adopted a new 340B contract pharmacy policy to address these risks by limiting shipments to 340B contract pharmacies that meet certain criteria. Our new contract pharmacy policy is intended to preserve patient access, while addressing compliance and integrity concerns resulting from the proliferation of contract pharmacies — problems that overshadow and threaten to undermine this vital safety net program. Nonetheless, certain 340B covered entities and the HHS, in a non-binding (and now-retracted) Advisory Opinion, stated that, in their view, manufacturers in the 340B program are obligated to sell 340B drugs at the 340B ceiling prices to all contract pharmacies acting as agents of a covered entity.

We and certain other manufacturers initiated litigation challenging the Advisory Opinion and HRSA’s position on contract pharmacies generally. HRSA subsequently withdrew the Advisory Opinion, but issued letters to manufacturers, including us, threatening enforcement action if the manufacturers do not abandon their 340B contract pharmacy policies. We filed suit against HHS and HRSA on June 23, 2021 in the U.S. District Court for the District of Columbia. On September 22, 2021, HRSA sent to us, along with the other manufacturers challenging HRSA’s 340B interpretation, letters stating that HRSA is referring “this issue to the HHS Office of the Inspector General” for potential enforcement action. We have not had any communication from OIG regarding our 340B contract pharmacy policy. On November 5, 2021, the court granted our motion for summary judgment, ruling that the letters threatening enforcement action “contain legal reasoning that rests upon an erroneous reading of Section 340B.” HRSA filed a notice of appeal on December 28, 2021, and the appeal is pending. If HRSA prevails on appeal or develops a new theory of liability, we may face enforcement action or penalties as well as adverse publicity. We expect the compliance of policies like ours will continue to be litigated.

If we and other manufacturers are unable to curb the proliferation of abuses caused by 340B contract pharmacies, we could see an increased prevalence of sales at reduced 340B ceiling prices, which could have a material adverse impact on our revenues.

Patient assistance programs for pharmaceutical products have come under increasing scrutiny by governments, legislative bodies, and enforcement agencies. These activities may result in actions that effectively reduce prices or demand for our products, harm our business or reputation, or subject us to fines or penalties.

Company-sponsored patient assistance programs, including insurance premium and co-pay assistance programs and manufacturers’ donations to third-party charities that provide such assistance, are subject to heightened scrutiny. The Department of Justice (**DOJ**) has taken enforcement action against pharmaceutical companies alleging violations of the Federal False Claims Act and other laws in connection with patient assistance programs. In December 2017, we entered into a civil Settlement Agreement with the U.S. Government to resolve a DOJ investigation of our support of non-profit patient assistance programs and paid \$210.0 million, plus interest, to the U.S. Government upon settlement. We also entered into a Corporate Integrity Agreement (the **CIA**) with the OIG, which requires us to maintain our corporate compliance program and to undertake a set of defined corporate integrity obligations for five years.

We may be required to incur significant future costs to comply with the CIA. If we fail to comply with applicable regulatory requirements or the CIA, or if our vendors or donation recipients fail to comply with applicable requirements or guidance, we could be subject to penalties including fines, suspension of regulatory approvals that cause us to suspend production, distribution or marketing activities, product recalls, seizure of our products, criminal prosecution, exclusion from participation in government healthcare programs, including Medicare and Medicaid, and burdensome remediation measures. Any of these penalties could adversely affect our operating results, the value of our company and our reputation. Patients and physicians may avoid using our products even after we have resolved the issues that led to adverse regulatory action.

Members of Congress have called upon the OIG to issue revised guidance about patient assistance programs. Actions taken by the OIG, the DOJ or other agencies as a result of this industry-wide inquiry could reduce demand for our products and/or coverage of our products by federal and state health care. If any or all of these events occur, our business, prospects, and stock price could be materially and adversely affected.

Payers and pharmacy benefit managers (**PBMs**) have developed mechanisms to limit the benefits of co-pay assistance for commercially insured programs through co-pay accumulator programs. These programs do not allow a patient using co-pay assistance to count the manufacturer’s co-payment contribution toward their annual out-of-pocket payment maximum. Therefore, patients using co-pay assistance are penalized financially for using these programs. Some states have passed legislation to limit the use of co-pay accumulator programs, while some other states have indicated that these programs should be allowed to limit cost of care and encourage patients to use lower cost generics. In addition, some states have imposed restrictions on manufacturer co-pay programs when therapeutic equivalents are available. Growing use of such programs, or new laws limiting manufacturer ability to provide co-pay assistance, could affect patient access to our products and limit product utilization, which may, in turn, adversely affect our business, prospects, and stock price.

Improper handling of hazardous materials used in our activities could expose us to significant remediation liabilities.

Our research and development and manufacturing activities involve the controlled use of chemicals and hazardous substances. We are expanding these activities in both scale and location. Patients may dispose of our products using means we do not control. Such activities subject us to numerous federal, state, and local environmental and safety laws and regulations that govern the management, storage, and disposal of hazardous materials. Compliance with current and future environmental laws and regulations can require significant costs. The risk of accidental contamination or injury from these materials cannot be completely eliminated. Once chemical and hazardous materials leave our facilities, we cannot control the manner in which such

Part II. Other Information

hazardous waste is disposed of by our contractors. We could be liable for substantial civil damages or costs associated with the cleanup of the release of hazardous materials and such liability could have a material adverse effect on our business.

The increasing use of social media platforms presents new risks and challenges.

Social media is increasingly being used to communicate information about our products and the diseases that our therapies are designed to treat. Social media practices in our industry continue to evolve and regulations related to such use are not always clear. This evolution creates uncertainty and risk of noncompliance. For example, patients and others may use social media channels to comment on the effectiveness of a product or to report an alleged adverse event. When such disclosures occur, we may fail to monitor and comply with applicable adverse event reporting obligations or we may not be able to defend against political and market pressures generated by social media due to restrictions on what we may say about our products. There is also a risk of inappropriate disclosure of sensitive information or negative or inaccurate comments about us on any social networking website. If any of these events occur or we otherwise fail to comply with applicable regulations, we could incur liability, face overly restrictive regulatory actions, or incur other harm to our business.

Risks Related to Our Intellectual Property and Data Privacy

If any of the agreements under which we license or acquired intellectual property rights are breached or terminated, we could lose our rights to continue to develop, manufacture, and sell the products covered by such agreements.

Our business depends upon our continuing ability to exploit our intellectual property rights acquired from third parties under product license and purchase agreements covering drugs or other products or technology. We may be required to license additional intellectual property owned by third parties to continue to develop and commercialize our products. This dependence on intellectual property developed by others involves the following risks:

- We may be unable to obtain rights to intellectual property that we need for our business at a reasonable cost or at all;
- If any of our product licenses or purchase agreements are terminated, we may lose our rights to develop, make, and sell the products to which such licenses or agreements relate;
- Our rights to develop and market products to which the intellectual property relates are frequently limited to specific territories and fields of use (such as treatment of particular diseases); and
- If a licensor of intellectual property fails to maintain the intellectual property licensed, we may lose any ability to prevent others from developing or marketing similar products covered by such intellectual property. In addition, we may be forced to incur substantial costs to maintain the intellectual property ourselves or take legal action seeking to force the licensor to do so.

Our intellectual property rights may not effectively deter competitors from developing competing products that, if successful, could have a material adverse effect on our revenues and profits.

The period under which our commercial and developmental therapies are protected by our patent rights is limited. Three of our U.S. patents covering our current methods of synthesizing and producing trestatinil, the active ingredient in Tyvaso, Tyvaso DPI, Remodulin, and Orenitram, expired in October 2017, and three more will expire in 2028. Our patents related to our individual trestatinil-based products expire at various times between 2024 and 2031. We entered into settlement agreements with a number of generic drug companies permitting certain companies to launch generic versions of Remodulin in the United States and other companies to launch generic versions of Orenitram and Tyvaso in the United States. A U.S. patent for Adcirca for treatment of pulmonary hypertension expired in November 2017, and FDA-conferred regulatory exclusivity expired in May 2018, leading to the launch of a generic version of Adcirca in August 2018. We have no issued patents or pending patent applications covering Unituxin. For further details, please see *Part I, Item 2—Management’s Discussion and Analysis of Financial Condition and Results of Operations—Generic Competition and Challenges to our Intellectual Property Rights*.

We cannot be sure that our existing or any new patents will effectively deter or delay competitors’ efforts to bring new products to market, or that additional patent applications will result in new patents. When our patents expire, competitors may develop generic versions of our products and market them at a lower price to compete with our products. Competitors may also seek to design around our patents or exclude patented methods of treatment, such as patent-protected indications, from the label for generic versions of our products in an effort to develop competing products that do not infringe our patents. In addition, patent laws of foreign jurisdictions may not protect our patent rights to the same extent as the patent laws of the United States.

Third parties have challenged, and may in the future challenge, the validity of our patents, through patent litigation and/or initiating proceedings, including re-examinations, IPRs, post-grant reviews, and interference proceedings, before the USPTO or other applicable patent filing offices, or other means. For example, Liquidia is challenging various patents related to Tyvaso and our other trestatinil-related patents.

Patent litigation can be time consuming, distracting, and costly, and the outcome may be difficult to predict and unfavorable to us. If we are unsuccessful in the defense of our patents, our business could be negatively impacted. Even if our patents are determined to be valid or enforceable, a competitor could circumvent our patents by effectively designing around the claims of our patents. Accordingly, our patents may not provide us with any competitive advantage.

We also rely on trade secrets to protect our proprietary know-how and other technological advances that we do not publicly disclose. Our confidentiality agreements with our Unitherians and others to whom we disclose trade secrets and confidential information may not necessarily prevent our trade secrets from being used or disclosed without our authorization. These agreements may be difficult, time-consuming, and expensive to enforce or may not provide an adequate remedy in the event of unauthorized disclosure. If our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent such third party, or those to whom they communicate such technology or information, from using that technology or information to compete with us, and our business and competitive position could be harmed.

Third parties may allege that our products or services infringe their patents and other intellectual property rights, which could result in the payment of royalties that negatively affect our profits, subject us to costly and time-consuming litigation, or cause us to lose the ability to sell the related products.

To the extent third-party patents to which we currently do not hold licenses are necessary for us to manufacture, use, or sell our products, we would need to obtain necessary licenses to prevent infringement. For products or services that utilize intellectual property of strategic collaborators or other suppliers, such suppliers may have an obligation to secure the needed license to these patents at their cost; if not, we would be responsible for the cost of these licenses. Royalty payments and other fees under these licenses would erode our profits from the sale of related products and services. Moreover, we may be unable to obtain these licenses on acceptable terms or at all. If we fail to obtain a required license or are unable to alter the design of the product to avoid infringing a third-party patent, we would be unable to continue to manufacture or sell related products.

If a third party commences legal action against us for infringement, we may incur significant costs to defend the action and our management's attention could be diverted from our day-to-day business operations, whether or not the action has merit. An adverse judgment or settlement resulting from the action could require us to pay substantial amounts in damages for infringement or to obtain a license to continue to use the intellectual property that is the subject of the infringement claim, or could result in injunctive relief limiting our ability to develop, manufacture, or sell our products.

Information technology security breaches and other disruptions could compromise our information and expose us to legal responsibility which would cause our business and reputation to suffer.

We are increasingly dependent on information technology systems and infrastructure, much of which is outsourced to third parties including in "cloud" based platforms. We collect, store, and use sensitive or confidential data, including intellectual property, our proprietary business information and that of our suppliers, customers, and business partners, and personally identifiable information. The secure maintenance of this information is critical to our operations and business strategy. We are subject to laws and regulations in the United States and abroad, such as the Health Insurance Portability and Accountability Act of 1996 and European Union regulations related to data privacy, which require us to protect the privacy and security of certain types of information. Our information technology and infrastructure may be vulnerable to attacks by hackers, breached due to employee error, malfeasance, or other disruptions, or subject to system failures. Because the techniques used to obtain unauthorized access, disable, or degrade service, or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or implement adequate preventive measures. Any breaches or failures could compromise sensitive and confidential information stored on our networks or those of third parties and expose such information to public disclosure, loss, or theft. Any actual or alleged unauthorized access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, disruption of our operations, and damage to our reputation, any of which could adversely affect our business, financial condition, or results of operations. Costs we may incur as a result of any of the foregoing, could adversely affect our business, financial condition, or results of operations. Given the increasing use of conferencing technologies to conduct business virtually in light of the COVID-19 pandemic, these cybersecurity risks are becoming more prevalent.

Risks Related to Our Financing Capacity, Indebtedness, and Investments

If we need additional financing and cannot obtain it, our product development and sales efforts may be limited.

We may be required to seek additional sources of financing to meet unplanned or planned expenditures. Unplanned expenditures could be significant and may result from necessary modifications to product development plans or product offerings in response to difficulties encountered with clinical trials. We may also face unexpected costs in preparing products for commercial sale, or in maintaining sales levels of our currently marketed therapeutic products. Our 2022 Credit Agreement contains affirmative and negative covenants that, among other things, limit our ability to incur additional indebtedness. If we are unable to obtain additional funding on commercially reasonable terms or at all, we may be compelled to delay clinical studies, curtail operations, or obtain funds through collaborative arrangements that may require us to relinquish rights to certain products or potential markets.

We may not be able to generate sufficient cash to service or repay our indebtedness, which may have a material adverse effect on our financial position, results of operations, and cash flows.

We may borrow up to \$2.0 billion under our 2022 Credit Agreement, which matures in March 2027. Currently, our outstanding principal balance is \$800.0 million. Our ability to repay or refinance our debt obligations under our 2022 Credit Agreement and

Part II. Other Information

any future debt that we may incur will depend on our financial condition and operating performance, which are subject to a number of factors beyond our control. We may be unable to maintain a level of cash flows from operating activities sufficient to permit us to pay the principal and interest on our indebtedness. Our inability to generate sufficient cash flows to satisfy our debt obligations would materially and adversely affect our financial position and results of operations. If we cannot repay or refinance our debt as it becomes due, we may be forced to take disadvantageous actions, including reducing or delaying investments and capital expenditures, disposing of material assets or operations, seeking additional debt or equity capital, or restructuring or refinancing our indebtedness. We may not be able to effect any such alternative measures on commercially reasonable terms or at all and, even if successful, such actions may not enable us to meet any such debt service obligations. In addition, our ability to withstand competitive pressures and to react to changes in our industry could be impaired.

Our portfolio of investments is subject to market, interest, operational, and credit risk that may reduce its value.

We maintain a portfolio of investments that includes: (1) corporate debt securities; (2) strategic investments in publicly-traded equity securities; and (3) strategic debt and equity investments in privately-held companies. These investments are subject to general economic conditions, volatility in the financial marketplace, market- and industry-wide dynamics, changes in interest rates, industry- and company-specific developments impacting the business, prospects, and credit ratings of the issuer of the securities, and other factors, each of which has affected, and may in the future affect, the income that we receive from our investments, the net realizable value of our investments, and our ability to sell them. These factors have caused, and could in the future cause, us to: (a) experience a decline in our investment income; (b) record impairment charges to reduce the carrying value of our investment portfolio; or (c) sell investments for less than our acquisition cost; each of which in turn could negatively impact our liquidity and our earnings. Our efforts to mitigate these risks through diversification of our investments and monitoring of our portfolio's overall risk profile may not be successful and the value of our investments may decline. The privately-held companies we have invested in may be particularly susceptible to the factors described above as these companies are typically in the early stages of developing technologies or products that may never materialize, which could result in a loss of all or a substantial part of our investment in these companies.

Risks Related to Our Common Stock

The price of our common stock can be highly volatile and may decline.

The price of common stock can be highly volatile within the pharmaceutical and biotechnology sector. Consequently, significant price and volume fluctuations in the market may not relate to operating performance. The price of our common stock could decline sharply due to general market conditions as well as the following factors, among others:

- Developments related to the COVID-19 pandemic and the associated economic impact, and their effects on our business, financial condition, or results of operations;
- Quarterly and annual financial results and any failure to meet our expectations or those of securities analysts;
- Timing of enrollment and results of our clinical trials;
- Announcements regarding generic or other challenges to the intellectual property related to our products, the launch of generic versions of our products or other competitive products, such as sotatercept or Yutrepia, and the impact of competition from generic and other products on our revenues;
- Announcements regarding litigation matters, including our ongoing patent litigation with Liquidia related to its NDA for Yutrepia, among others;
- Announcements regarding our efforts to obtain FDA approval of, and to launch, new products;
- Physician, patient, investor, or public concerns regarding the efficacy and/or safety of products marketed or being developed by us or by others;
- Changes in, or new laws and regulations affecting reimbursement of, our therapeutic products by government payers, changes in reimbursement policies of private insurance companies, and negative publicity surrounding the cost of high-priced therapies;
- Announcements of technological innovations or new products or announcements regarding our existing products, including in particular the development of new, competing therapies;
- Substantial sales of our common stock by us or our existing shareholders, or concerns that such sales may occur;
- Future issuances of common stock by us or other activity which could be viewed as being dilutive to our shareholders;
- Rumors or incorrect statements by investors and/or analysts concerning our company, our products, or our operations;
- Failures or delays in our efforts to obtain or maintain domestic or international regulatory approvals;
- Discovery of previously unknown problems with our marketed products, or problems with our manufacturing, regulatory, compliance, promotional, marketing or sales activities that result in regulatory penalties or restrictions on our products, up to the withdrawal of our products from the market; and

- Accumulation of significant short positions in our common stock by hedge funds or other investors or the significant accumulation of our common stock by hedge funds or other institutional investors with investment strategies that may lead to short-term holdings.

Provisions of Delaware law, our charter, bylaws and employment and license agreements, among other things, could prevent or delay a change of control or change in management that may be beneficial to our public shareholders.

Certain provisions of Delaware law, our restated certificate of incorporation, and our ninth amended and restated bylaws may prevent, delay, or discourage a merger, tender offer, or proxy contest; the assumption of control by a holder of a large block of our securities; and/or the replacement or removal of current management by our shareholders. For example, our restated certificate of incorporation previously divided our Board of Directors into three classes. The recent declassification of our Board will be phased in and all directors will not be elected annually until our 2023 annual meeting of shareholders. This provision may make it more difficult for shareholders to replace the majority of directors until such time. It may also deter the accumulation of large blocks of our common stock by limiting the voting power of such blocks. In addition, as a result of our recent conversion to a PBC, our Board is required to consider and balance the financial interests of shareholders, the interests of stakeholders materially affected by our conduct, and the pursuit of our specific public benefit purpose when evaluating takeover offers. This requirement of Delaware PBC law may make our company a less attractive takeover target than a traditional for-profit corporation.

Non-competition and all other restrictive covenants in most of our employment agreements will terminate upon a change of control that is not approved by our Board. Similarly, a change of control, under certain circumstances, could accelerate the vesting of outstanding stock options, and restricted stock units. Any increase in our stock price resulting from the announcement of a change of control, and our broad-based change of control severance program, under which Unitherians may be entitled to severance benefits if they are terminated without cause (or they terminate their employment for good reason) following a change of control, could make an acquisition of our company significantly more expensive to the purchaser.

We enter into certain license agreements that generally prohibit our counterparties or their affiliates from taking necessary steps to acquire or merge with us, directly or indirectly throughout the term of the agreements, plus a specified period thereafter. We are also party to certain license agreements that restrict our ability to assign or transfer the rights licensed to us to third parties, including parties with whom we wish to merge, or those attempting to acquire us. These agreements often require that we obtain prior consent of the counterparties if we contemplate a change of control. If these counterparties withhold consent, related agreements could be terminated and we would lose related license rights. For example, Lilly and MannKind have the right to terminate our license agreements related to Adcirca and Tyvaso DPI, respectively, in the event of certain change of control transactions. These restrictive change of control provisions could impede or prevent mergers or other transactions that could benefit our shareholders.

Our shareholders must rely on stock appreciation for any return on their investment in us.

We have never paid, and do not intend to pay, cash dividends. Our 2022 Credit Agreement may restrict us from doing so. As a result, the return on an investment in our common stock depends entirely upon the future appreciation, if any, in the price of our common stock.

Our exclusive forum bylaw may limit our shareholders' ability to bring a claim in a forum that they find favorable for disputes with us or our directors, officers, or other Unitherians.

Our bylaws provide that, to the fullest extent permitted by law, unless we agree in writing to an alternative forum, (a) the Delaware Court of Chancery (or, if such court does not have, or declines to accept, jurisdiction, another state court or a federal court located in Delaware) will be the exclusive forum for any complaint asserting any internal corporate claims, including claims in the right of the corporation based upon a violation of a duty by a current or former director, officer, Unitherian, or stockholder in such capacity, or as to which the Delaware General Corporation Law confers jurisdiction upon the Court of Chancery, and (b) the federal district courts will be the exclusive forum for any complaint asserting a cause of action arising under the Securities Act of 1933, as amended. The choice of forum provision may limit our shareholders' ability to bring a claim in a forum that they find favorable for disputes with us or our directors, officers, or other Unitherians, and may discourage such lawsuits. There is uncertainty as to whether a court would enforce this provision. If a court ruled the choice of forum provision was inapplicable or unenforceable in an action, we may incur additional costs to resolve such action in other jurisdictions. Our choice of forum provision is intended to apply to the fullest extent permitted by law to the above-specified types of actions and proceedings, including any derivative actions asserting claims under state law or the federal securities laws. Our shareholders will not be deemed, by operation of the choice of forum provision, to have waived our obligation to comply with all applicable federal securities laws and the rules and regulations thereunder.

In September 2021, we converted to a Delaware PBC. Conversion may not result in the benefits that we anticipate, requires our directors to balance the interest of shareholders with other interests, and may subject us to additional litigation and other risks.

On September 30, 2021, our shareholders approved an amendment to our restated certificate of incorporation to become a PBC, and we completed the conversion to a PBC that same day. While our Board believes that our conversion to a PBC is in the best interest of shareholders, our status as a PBC may not result in the benefits that we anticipate. For example, we may not be able to achieve our public benefit purpose or realize the expected positive impact from being a PBC.

Part II. Other Information

One of the primary distinctions between a PBC and a traditional Delaware for-profit corporation is that, in making decisions, the directors of a PBC have an obligation to balance the financial interests of shareholders, the interests of stakeholders materially affected by the PBC's conduct, and the pursuit of the corporation's specific public benefit purpose. The application of this balancing obligation may allow our directors to make decisions that they could not have made pursuant to the fiduciary duties applicable prior to PBC conversion. There is no guarantee that our Board will resolve conflicts among the financial interests of our shareholders, our specific public benefit purpose, or stakeholders materially affected by our conduct, in favor of our shareholders' financial interests. For instance, in a sale of control transaction, our Board would be required to consider and balance the factors listed above and might choose to accept an offer that does not maximize short-term shareholder value due to its consideration of other factors. This requirement of Delaware PBC law may make our company a less attractive takeover target than a traditional for-profit corporation.

A Delaware PBC must also provide its shareholders with a statement, at least every other year, as to the PBC's assessment of the success of its efforts to promote its public benefit purpose and the best interests of those materially affected by the PBC's conduct. If the public perceives that we are not successful in promoting our public benefit purpose, or that our pursuit of our public benefit purpose is having a negative effect on the financial interests of our shareholders, that perception could negatively affect our reputation, which could adversely affect our business, results of operations and stock price. In addition, Delaware's PBC statute may be amended to require more explicit or burdensome reporting requirements that could increase the time and expense required to comply.

As a Delaware PBC, we may be subject to increased litigation risk.

Shareholders of a Delaware PBC (if they, individually or collectively, own the lesser of (1) two percent of the PBC's outstanding shares; or (2) shares with a market value of \$2 million or more on the date the lawsuit is instituted) can file a derivative lawsuit claiming the directors failed to balance shareholder and public benefit interests. Traditional Delaware for-profit corporations are not subject to this potential liability. As a PBC, we may be subject to increased derivative litigation, which may be costly and require management's attention, which may adversely affect our financial condition and results of operations. In addition, there is currently limited case law involving PBCs (including case law interpreting and applying the balancing obligation of PBC directors), which may expose us to additional litigation risk generally until additional case law develops or additional legislative action is taken.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the nine months ended September 30, 2022, we did not (a) repurchase any of our outstanding equity securities; or (b) sell any of our equity securities in transactions that were not registered under the Securities Act of 1933, as amended.

Item 6. Exhibits

| Exhibit No. | Description |
|-------------|---|
| 3.1 | Restated Certificate of Incorporation of the Registrant, incorporated by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed October 1, 2021. |
| 3.2 | Ninth Amended and Restated Bylaws of the Registrant, incorporated by reference to Exhibit 3.1 of the Registrant's Current Report on Form 8-K filed February 5, 2021. |
| 4.1 | Reference is made to Exhibits 3.1 and 3.2 . |
| 31.1* | Certification of Principal Executive Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934. |
| 31.2* | Certification of Principal Financial Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934. |
| 32.1* | Certification of Principal Executive Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 32.2* | Certification of Principal Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. |
| 101* | The following financial information from our Quarterly Report on Form 10-Q for the quarter ended September 30, 2022, filed with the SEC on November 2, 2022, formatted in Inline Extensible Business Reporting Language (iXBRL): (1) our Consolidated Balance Sheets as of September 30, 2022 and December 31, 2021; (2) our Consolidated Statements of Operations for the three- and nine-month periods ended September 30, 2022 and 2021; (3) our Consolidated Statements of Comprehensive Income for the three- and nine-month periods ended September 30, 2022 and 2021; (4) our Consolidated Statements of Stockholders' Equity for the three- and nine-month periods ended September 30, 2022 and 2021; (5) our Consolidated Statements of Cash Flows for the nine-month periods ended September 30, 2022 and 2021; and (6) the Notes to our Consolidated Financial Statements. |
